

Power Your Plan with Real-Time Insights

New, Free Enhanced Reporting Tool Updates Member Transaction Data Hourly

The Right Tool to Help You Oversee Your Plan

POS Activity Monitoring, the new reporting tool available on RxBIRT, provides real-time claims adjudication data and trends to help you understand impacts to your plan.

Monitor Transactions

Access data (updated hourly) of paid and rejected transactions, trends in brand vs generic drugs, average copays, days' supply and more.

Evaluate Trends

View trends of reject-specific information, such as refill-too-soon, quantity limits, step therapy and other key rejects.

Drill-down Data

Access data at the transactional level by day and time, as well as top drug trends.

Receive Automated Alerts

Get notified when reject rate and average copays cross client-set thresholds.

Rx Business Intelligence Reporting Tool (RxBIRT) puts member data in your hands.

RxBIRT is built on industry leading BI (Business Intelligence) platform and empowers clients with self-service access to standard and enhanced reports, such as summary key performance indicators, top drugs, decision turnaround times, prescribers, members and clinical reports.

Other Features of RxBIRT:

- Reject Report for key reject information
- Member Reject Report for rejects without subsequent paid claims
- Coverage Determinations Turnaround Time Report for turn-around times on decision, effectuation, oral and written member notifications for standard/expedited coverage determinations and redeterminations, and ability to drill down to individual requests
