March 9, 2016

Mr. James Marshall City of Phoenix Street Transportation Department Environmental Section 200 West Washington Street, 5<sup>th</sup> Floor Phoenix, Arizona 85003

Re: Phase I Environmental Site Assessment Trailer Park 8930 North 3<sup>rd</sup> Street Phoenix, Arizona 85020 COP Project Number: ND30040038 <u>AECOM Job No. 60488618</u>

Dear Mr. Marshall:

In accordance with our proposal dated January 4, 2016, AECOM Technical Services, Inc. (AECOM) has completed a Phase I Environmental Site Assessment on the abovereferenced property. The attached report summarizes the findings of this assessment.

We are pleased to be of service to City of Phoenix. Should you have any questions or if we may be of some additional service, please contact AECOM at (602) 371-1100.

Sincerely, **AECOM** 

MBurrus

Marianne Burrus Project Environmental Scientist

Elizabeth Parker Environmental Scientist

### **EXECUTIVE SUMMARY**

AECOM Technical Services, Inc. (AECOM) was retained by the City of Phoenix to conduct a Phase I Environmental Site Assessment (ESA) on the trailer park property located at 8930 North 3<sup>rd</sup> Street in Phoenix, Maricopa County, Arizona (the "site" or "subject property"). This Phase I ESA was conducted in conjunction with the City of Phoenix project number ND30040038 and in accordance with AECOM's proposal to the City of Phoenix January 4, 2016 and the City of Phoenix Notice to Proceed dated February 16, 2016.

The Phase I ESA was conducted to identify Recognized Environmental Conditions (RECs) related to past and current land use practices at the site and is consistent with the methods and procedures described in the ASTM International (ASTM) *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (Standard Designation E1527-13) (ASTM, 2013), the Code of Federal Regulations (CFR) *Innocent Landowners, Standards for Conducting All Appropriate Inquiries (AAI)* (40 CFR Part 312) (CFR, 2013), and with the City of Phoenix scope of work. ASTM defines RECs as "the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment." The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include *de minimis* conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* are not RECs.

Ms. Marianne Burrus and Mr. Matt Kiviko conducted a reconnaissance of the site on February 23, 2016 to observe and document present site conditions. AECOM was escorted during the site reconnaissance by the current property owners, Lida and Scot Martin, and City of Phoenix representative Jesse Garcia. The interiors of the occupied residences (mobile homes and two unit rental) on the subject property were not accessed; however, the interiors of the unoccupied mobile homes were viewed from the windows. All common areas and the interior of the maintenance buildings were physically inspected. Based on their uses, the lack of access to the occupied residences is not considered to be a limiting condition for this assessment. No other conditions were encountered that would limit AECOM's ability to make appropriate conclusions regarding the environmental integrity of the subject property.

The subject property is an approximately 31,250-square foot trailer park and is located at 8930 North 3<sup>rd</sup> Street. The approximately 1,336-square-foot building was constructed in approximately 1959 and is of slab-on-grade, masonry brick and wood frame construction. The building includes a two-rental unit, a laundry room and restroom. A separate maintenance shed is

located southwest of the building and a second maintenance building, reportedly a former bath house, was located south of the maintenance shed. The trailer park includes approximately 24 mobile home pads, ten of which were occupied. The buildings and mobile home pads are surrounded by asphalt parking and landscaped areas. Four entrance driveways are located along 3<sup>rd</sup> Street on the eastern side of the subject property.

Typical residential-style cleaning products, automotive and building maintenance chemicals in retail-sized containers were observed on the subject property. In addition, residential-sized propane cylinders were observed adjacent to several of the mobile homes. An approximately 5-gallon bucket containing an oily substance, likely waste oil from an automobile, was observed adjacent to one of the mobile homes. In addition, oily staining was observed on the paved parking and drive areas of the subject property. The oily container and oily staining is considered to be a *de minimis* condition to the subject property.

The subject property is bordered by Graze Deals used car sales (8990 North 3<sup>rd</sup> Street) and Juliobertos Mexican Foods (229 East Dunlap Avenue) to the north; single and multi-family residences to the south; Dunlap Avenue, Firestone/Central Car Care (301 East Dunlap Avenue), City of Phoenix Sunnyslope Transit Center (8927 North 3<sup>rd</sup> Street) and a vacant lot to the east; and an alley, office buildings (8927 North 2<sup>nd</sup> Way and 8935 North 2<sup>nd</sup> Way) and single-family residences to the west.

Historical information indicates that the subject property was developed as a trailer park prior to 1949. No definitive historical use prior to 1940 was identified. In addition, no previous property owner has been interviewed. Because the subject property appeared to be a trailer park and vacant land at that time, it is AECOM's opinion that no significant data failures that would warrant further investigation were noted during our assessment.

According to Laurene Montero of the City of Phoenix Archaeology Section, no known archaeology sites are located within the project area and no further archaeology work is necessary for this project. However, if archaeological materials are encountered during construction, all ground-disturbing activities must cease within 10 meters of the discovery and the City of Phoenix Archaeology Office must be notified immediately and allowed time to properly assess the materials.

#### **Findings and Opinions**

Based on our site reconnaissance and a review of historical and regulatory information, no RECs, controlled RECs, historical RECs or significant data gaps were identified for the subject property. The following *de minimis* condition was identified for the subject property:

• Areas of oily staining were observed on the asphalt-paved areas of the subject property and an approximately 5-gallon container of an oily substance (likely waste oil) was ν

vi

observed adjacent to one of the mobile homes. AECOM considers this a *de minimis* condition.

#### **Conclusions and Recommendations**

Based on the scope of services performed for this Phase I ESA, AECOM recommends no further assessment of the subject property at this time. This Executive Summary is presented for convenience only and should not be used in lieu of information presented in the entire report.

# 1.0 INTRODUCTION

AECOM Technical Services, Inc. (AECOM) was retained by the City of Phoenix to conduct a Phase I Environmental Site Assessment (ESA) on the trailer park property located at 8930 North 3rd Street in Phoenix, Maricopa County, Arizona (the "site" or "subject property"). This Phase I ESA was conducted in conjunction with the City of Phoenix project number ND30040038 and in accordance with AECOM's proposal to the City of Phoenix January 4, 2016 and the City of Phoenix Notice to Proceed dated February 16, 2016.

The Phase I ESA was conducted to identify Recognized Environmental Conditions (RECs) related to past and current land use practices at the site and is consistent with the methods and procedures described in the ASTM International (ASTM) *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (Standard Designation E1527-13) (ASTM, 2013), and the Code of Federal Regulations (CFR) *Innocent Landowners, Standards for Conducting All Appropriate Inquiries (AAI)* (40 CFR Part 312) (CFR, 2013).

#### 1.1 PURPOSE

The purpose of the Phase I ESA is to evaluate a property for potential environmental impact, assess potential for liability, determine landowner protections under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), and determine if additional assessment of the property is warranted. In general accordance with ASTM Standard E1527-13 and AAI, this assessment was conducted to identify RECs associated with the subject property. ASTM defines RECs as "the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment." The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include *de minimis* conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* are not RECs.

In addition to the revised definition of a REC, ASTM Standard E1527-13 was revised to include controlled RECs. ASTM defines a controlled REC as "a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority... with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls." An example of a controlled REC would be a property with a previous release of hazardous materials or petroleum products remediated to non-residential use standards, with a property use restriction, activity and use limitation or institutional or engineering control in place.

#### 1.2 SCOPE OF SERVICES

The Phase I ESA was prepared in accordance with the Scope of Work described in AECOM's proposal to the City of Phoenix dated January 4, 2016. The work conducted by AECOM is limited to the services agreed to in the proposal and no other services beyond those explicitly stated should be inferred or are implied.

The environmental assessment was accomplished by, and limited to, a reconnaissance of the site, a drive-by survey of the site vicinity, a review of publicly available records, a review of pertinent documentation presently and reasonably ascertainable, information from the client and/or through standard resources, and interviews of knowledgeable individuals. The site vicinity is defined as the neighboring properties and facilities within an approximate distance of ¼ mile of the site, the nature of which may adversely affect or have affected environmental conditions at the site due to the presence and/or release of hazardous substances or petroleum products to the environment. AECOM's scope of services for the environmental assessment included the following elements:

- Review of available documents regarding past and/or current site development provided by the City of Phoenix, if any. In addition, AECOM obtained a historical title report for the subject property.
- Review and interpretation of available historical aerial photographs of the site and surrounding area to allow inference regarding historical site development.
- Review and interpretation of available archival topographic maps, historical land use maps of the site, and the area within ¼ mile of the subject property for information regarding historical site land use that could have involved the manufacture, generation, use, storage and/or disposal of hazardous substances.
- Review of pertinent, available documents and maps regarding local geologic and hydrogeologic conditions.
- Performance of an onsite visual reconnaissance of the subject property and the area within a ¼-mile radius of the site to make visual observations of existing site conditions and activities and types of land use and businesses within the search area. During the site visit, AECOM noted the use or disposal (if any) of hazardous waste, industrial chemicals, or petroleum products, including the amounts stored onsite and the method of storage.
- Review of the following state and federal agency lists of known or potential hazardous waste sites, and sites currently under investigation for potential environmental violations within the following prescribed ASTM minimum search distances:

Regulatory Database	Search Distance
Federal NPL site list	1.0 mile
Federal Delisted NPL site list	1/2 mile
Federal CERCLIS and CERCLIS NFRAP site list	1/2 mile
Federal RCRA CORRACTS facilities list	1.0 mile
Federal RCRA non-CORRACTS TSD facilities list	1/2 mile
Federal RCRA generators list	Target and adjoining properties
Federal institutional/engineering control registries	Target property only
Federal ERNS list	Target property only
State list of hazardous waste sites:	
State- equivalent NPL	1.0 mile
State- equivalent CERCLIS	½ mile
State landfill and/or solid waste disposal site lists	½ mile
State and tribal leaking UST lists	½ mile
State and tribal registered UST lists	Target and adjoining properties
State institutional/engineering control registries	Target property only
State voluntary cleanup sites	½ mile
State Brownfield sites	½ mile

- Inquiries by telephone or writing to applicable municipal, county, and state regulatory agencies for information regarding environmental permits, environmental violations or incidents and/or status of enforcement actions at the subject property. Agency contacts included the Arizona Department of Environmental Quality (ADEQ), Arizona Department of Water Resources (ADWR), Maricopa County Environmental Services Department (MCESD), the City of Phoenix Planning and Development Department (PDD) and the City of Phoenix Fire Department.
- Interviews with subject property owners (past and present), property managers, tenants, and/or maintenance personnel, as available or appropriate, to evaluate site history and operation and maintenance procedures.
- Inquiry by writing to the City of Phoenix Archaeologist regarding archaeological sites located on the subject property.
- Preparation of a final report, describing the research performed and presenting AECOM's findings and professional opinion regarding the potential for environmental impairment of the subject property.

It was not in our scope and we did not assess structural, mechanical, electrical systems, environmental regulatory compliance, or worker health and safety issues. Sampling and analysis for asbestos, radon, lead-based paint, lead in drinking water, or other environmental media were not included in our scope of services.

#### 1.3 LIMITATIONS AND EXCEPTIONS

This report and the associated work have been provided in accordance with the principles and practices generally employed by the local environmental consulting profession. This is in lieu of all warranties, expressed or implied.

This study was not intended to be a definitive investigation of possible contamination at the subject property. The purpose and scope of this investigation was to determine if there is reason to suspect the possibility of contamination at the site. This ESA is not a regulatory compliance audit or an evaluation of the efficiency of the use of any hazardous materials at the subject property. No exploratory borings, soil or groundwater sampling, or laboratory analyses were performed at the property and, therefore, the conclusions set forth herein are made without the benefit of such investigation. Given that the Scope of Services for this investigation was limited, it is possible that currently unrecognized contamination may exist at the site.

The conclusions presented in this report are professional opinions based solely upon indicated data described in this report, visual observations of the site and vicinity, and our interpretation of the available historical information and documents reviewed, as described in this report. Unless AECOM has actual knowledge to the contrary, information obtained from interviews or provided to AECOM by the client has been assumed to be correct and complete. AECOM does not assume any liability for information that has been misrepresented to us by others or for items not visible, accessible or present on the subject property during the time of the site reconnaissance. The conclusions are intended exclusively for the purpose outlined herein and the site location and project indicated. The Scope of Services performed in execution of this investigation may not be appropriate to satisfy the needs of other users, and any use or reuse of this document or the findings, conclusions, or recommendations presented herein is at the sole risk of said user.

Opinions and recommendations presented herein apply to the site conditions existing at the time of our investigation and cannot necessarily apply to site changes of which AECOM is not aware and has not had the opportunity to evaluate. Changes in the conditions of this property may occur with time due to natural processes or the works of man on the subject site or adjacent properties. Changes in applicable standards may also occur as a result of legislation or the broadening of knowledge. Accordingly, the findings of this report may be invalidated, wholly or in part, by changes beyond our control. Opinions and judgments expressed herein are based on AECOM's understanding and interpretation of current regulatory standards, and should not

be construed as legal opinions. This report is intended to be used in its entirety. No excerpts may be taken to be representative of the findings of this assessment.

#### 1.4 USER RELIANCE

The information provided by AECOM is for the exclusive use of the City of Phoenix. The scope of services performed during this investigation may not be appropriate for other users, and any use or re-use of this document, or the findings, conclusions, or recommendations presented herein is at the sole risk of said user.

#### 1.5 DATA GAPS

Discussions of ASTM E1527-13 or AAI data gaps, if any, including sources reviewed, the significance of each data gap, and an opinion if the data gap inhibits the environmental professional's ability to reach an opinion about contamination at the property, are incorporated into the appropriate sections of the report and summarized below.

 Historical information indicates that the subject property was developed as a trailer park prior to 1949. No definitive historical use prior to 1940 was identified. Because the subject property appeared to be a trailer park and vacant land at that time, it is AECOM's opinion that no significant data failures that would warrant further investigation were noted during our assessment.

#### 1.6 PROJECT PERSONNEL

This Phase I ESA was conducted and reviewed by Ms. Marianne Burrus, Ms. Elizabeth Parker and Mr. Matt Kiviko. Ms. Parker and Ms. Burrus are Environmental Professionals as defined by ASTM. Copies of their résumés are included in Appendix A. Qualification statements of the environmental professionals responsible for conducting the ESA and preparing this assessment are summarized in Section 10.0.

### 2.0 SITE DESCRIPTION

Information concerning the subject and adjoining properties presented in the following subsections is based on a review of readily available published information and a site reconnaissance conducted by Ms. Burrus and Mr. Kiviko on February 23, 2016.

The subject property is located on the west side of 3<sup>rd</sup> Street and south of Dunlap Avenue in Phoenix, Maricopa County, Arizona (see Figure 1). The following information was provided by the Maricopa County Assessor's office (online) and the City of Phoenix:

Parcel #	Street Address Owner	Subdivision Name	Shape and Size
160-50-079	8930 North 3 <sup>rd</sup> Street Scot E and Lida K Martin Family LP	Sunnyslope Lot 8	Rectangular-shaped parcel totaling 31,250 square feet

#### 2.1 CURRENT GENERAL CHARACTERISTICS AND USE OF THE SITE

The subject property is zoned by the City of Phoenix for general commercial use (C-3) on the northern portion of the property and multiple-family residential use (R-5) on the southern portion of the property. The subject property is currently developed with a trailer park. A detailed description of improvements on the subject property and AECOM's site observations are included in Section 5.0.

# 2.2 CURRENT GENERAL CHARACTERISTICS AND USE OF THE ADJACENT PROPERTIES

A visual assessment of adjoining properties was performed in the general vicinity (within approximately ¼ mile) of the site, to the extent they were visible from the subject property and public rights-of-way. We did not physically access adjacent properties. Surrounding properties consist primarily of commercial and residential properties. Properties observed immediately adjacent to the subject property are as follows:

- **To the north:** Graze Deals used car sales (8990 North 3<sup>rd</sup> Street) and Juliobertos Mexican Food restaurant (229 East Dunlap Avenue)
- To the south: Single and multi-family residences
- **To the east:** 3<sup>rd</sup> Street, Firestone/Central Car Care (301 East Dunlap Avenue), City of Phoenix Sunnyslope Transit Center (8927 North 3<sup>rd</sup> Street) and a vacant lot
- **To the west:** An alley, single-family residences and office buildings (8927 and 8935 North 2<sup>nd</sup> Way)

No evidence of environmental impairment of the subject property associated with chemical use, storage, or disposal on adjoining properties was observed during our site reconnaissance. It should be noted that adjacent properties were identified in one or more environmental databases reviewed (see Section 4.1.2).

## 3.0 USER PROVIDED INFORMATION

The following subsections summarize user information provided by the City of Phoenix, as required by ASTM. A copy of the User Questionnaire provided by Mr. Chris Christensen, Neighborhood Services Department (City of Phoenix), is included in Appendix B.

#### 3.1 TITLE RECORDS

As required by the City of Phoenix, a historical title report was procured by AECOM and the information is included in Section 4.4.3.

#### 3.2 ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATION

Mr. Christensen did not indicate knowledge of environmental liens associated with the subject property, past environmental issues regarding the subject property, or any use limitations affecting the subject property. In addition, no use restrictions were noted on the historical title report obtained for this assessment (see Section 4.4.3).

#### 3.3 SPECIALIZED KNOWLEDGE AND REASONABLY ASCERTAINABLE INFORMATION

Mr. Christensen did not indicate any commonly known or reasonably ascertainable information regarding the subject property that would be material to this assessment.

#### 3.4 VALUATION REDUCTION FOR ENVIRONMENTAL ISSUES

Mr. Christensen indicated the purchase price for the subject property will not be less than the appraised value.

#### 3.5 OWNER, PROPERTY MANAGER, AND OCCUPANT INFORMATION

Mr. Christensen provided AECOM with the name of the current subject property owners: Scot and Lida Martin.

#### 3.6 REASON FOR PERFORMING PHASE I

The City of Phoenix is considering purchasing the subject property.

## 4.0 RECORDS REVIEW

Federal and state governments have developed legislation relating to environmental issues. As a result of this legislation, regulations that govern the storage, handling, control, and disposal of hazardous materials have been promulgated. Numerous agencies collect and disseminate information for use in evaluating potential environmental problems. The following subsections summarize information reviewed by AECOM.

#### 4.1 STANDARD ENVIRONMENTAL RECORD SOURCES

AECOM reviewed information gathered from several environmental databases through Environmental Data Resources, Inc. (EDR) to evaluate whether activities on or near the subject property have the potential to create a REC on the subject property. EDR reviews current databases compiled by federal, state, and local governmental agencies. The complete list of databases reviewed by EDR is provided in EDR Report No. 4545094.2s (EDR, 2016), which is included as Appendix C of this report. It should be noted that this information is reported as AECOM received it from EDR, which, in turn, reports information as it is provided in various government databases. It is not possible for either AECOM or EDR to verify the accuracy or completeness of information contained in these databases. However, the use of and reliance on this information is a generally accepted practice in the conduct of environmental due diligence. The following U.S. Environmental Protection Agency (EPA) and ADEQ documents and lists were reviewed in accordance with the minimum search distances specified in ASTM E1527-13 (as shown).

Type of Database	Description of Database	Radius Searched	Number of Sites Identified
Federal Datab	ases		
NPL	The National Priorities List (NPL) identifies uncontrolled or abandoned hazardous waste sites. To appear on the NPL, sites must have met or surpassed a predetermined hazard ranking system score, been	1 mile	0
	chosen as a state's top priority site, pose a significant health or	Delisted	NPL Sites
	environmental threat, or be a site where the EPA has determined that remedial action is more cost-effective than removal action. Revision Date – October 2015	½ mile	0
CERCLIS	The Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) database identifies hazardous	½ mile	0
	waste sites that require investigation and possible remedial action to mitigate potential negative impacts on human health or the	NFRA	P Sites
	environment. Including those with No Further Remedial Action Planned (NFRAP).	½ mile	0
RCRA TSDs	Revision Date – October 2013 EPA's Resource Conservation and Recovery Information System (RCRIS) identifies and tracks hazardous waste from the point of generation to the point of disposal. The RCRIS Treatment, Storage, Disposal (TSD) Facilities List is a compilation by EPA of reporting facilities that generate, transport, store, treat, or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA) but are not undergoing any "corrective action." Revision Date – June 2015	½ mile	0
CORRACTS	RCRA TSD facilities ordered to implement corrective actions. A "corrective action order" is issued pursuant to RCRA Section 3008 (h) when there has been a release of hazardous waste or constituents into the environment from a RCRA TSD facility. Corrective actions may be required beyond the facility's boundary and can be required regardless of when the release occurred, even if it predates RCRA. Revision Date – June 2015	1 mile	0
RCRA Generators	RCRA-regulated hazardous waste generator notifiers list; both Large and Small Quantity Generators are included in this list. (LQG – Large Quantity Generator, SQG – Small Quantity Generator, CESQG – Conditionally Exempt SQG, NonGen – no longer generates hazardous waste). Revision Date – June 2015	TP/AP	0
Eng./Inst. Controls	Federal Engineering and Institutional Controls database lists sites with controls currently in-place to either prevent exposure to contaminants remaining onsite or establish treatment methods to protect the environment and/or human health. Revision Date – September 2015	TP	0
ERNS	EPA's Emergency Response Notification System (ERNS) list contains reported spill records of oil and hazardous substances. Revision Date – June 2015	TP	0

Type of Database	Description of Database	Radius Searched	Number of Sites Identified
Arizona State	· · · · · · · · · · · · · · · · · · ·	Searcheu	Identified
WQARF	A Water Quality Assurance Revolving Fund (WQARF) area, which is also referred to as a state Superfund area, is a region designated by ADEQ for further investigation regarding environmental concerns. This designation typically is based on known areas of groundwater contamination, or past or present land uses that have been known to use and discharge chemicals that can contaminate groundwater. Revision Date – September 2015	1 mile	0
SPL/SHWS	The Arizona CERCLIS Information Data System (ACIDS) list was used by the ADEQ Superfund Programs Section (SPS) prior to July 2000. This list is referred to as the State Hazardous Waste Site (SHWS) by EDR. The ACIDS list was replaced with the Arizona Superfund Program List (SPL) and is more representative of the sites within the jurisdiction of the SPS since April 1997. Revision Date – August 2004 (SPL) / January 2000 (SHWS)	½ mile	0
SWLF	State inventory of solid waste disposal and landfill sites. Revision Date – October 2015	½ mile	0
LUST	List of information pertaining to all reported leaking underground storage tanks (LUSTs). Revision Date – November 2015	½ mile	12
UST	State underground storage tank sites listing. The State of Arizona requires that owners of most USTs register their USTs with ADEQ. Revision Date – November 2015	TP/AP	0
AUL	A Declaration of Environmental Use Restriction (DEUR) is a restrictive use covenant which accompanies the title to a property. The DEUR is an elective process sought by a property owner when 1) contamination is left at a property that exceeds the residential soil remediation standard, or when 2) an institutional or engineering control remains as a means to meet remediation goals. Revision Date – October 2015	TP	0
VCP	Sites involved in the Voluntary Remediation Program. Revision Date – August 2015	½ mile	0
BTS	Brownfields Tracking System (BTS). Revision Date – August 2015	½ mile	0
Drywells	State drywell registration list. Drywells typically are constructed on commercially developed properties to collect rainwater surface runoff, and therefore have the potential to introduce contaminants into the subsurface. Revision Date – December 2015	TP	0
Drycleaners	List of drycleaner facilities in Arizona. Report prepared by Miller Brooks Environmental, Inc. for ADEQ and provided by ADEQ (Miller Brooks, 2006). Report Date – June 2006	TP/AP	0
Unremediated Meth Lab	The Arizona State Board of Technical Registration list of seized drug laboratory sites or sites where drug manufacturing chemicals were seized. Remediated sites are removed from the list when notification is received from a certified clean-up firm. Reviewed online date: February 25, 2016	TP	0

#### 4.1.1 Subject Property

The subject property was not identified in any of the databases reviewed (as summarized above).

#### 4.1.2 Adjacent Properties

The following properties adjacent to the subject property were listed on the identified databases.

#### Drycleaner

According to EDR, the following potential historical drycleaner site was identified adjacent to the subject property.

Facility Nam	ie	Address	Distance Cardinal Direction	Status	REC
Sunnyslope	_dry All	8990 North 3 <sup>rd</sup> Street	Adjacent, north	1950 – 1955	No

According to EDR, this facility operated as a laundry on the adjacent property to the north in 1950 and 1955. This facility was not listed on the ADEQ drycleaner database (Miller Brooks, 2006) and no information reviewed indicates that dry cleaning operations were conducted at this facility. Therefore, this facility is not considered to be a REC to the subject property.

#### Automotive Service Stations

According to EDR, the following facilities adjacent to the subject property were listed as historical automotive service stations.

Facility Name	Address	Distance Cardinal Direction	Status	REC
Allied Towing & Storage	8931 North 2 <sup>nd</sup> Way	Approximately 15 feet, west	1982	No
Central Car Care	301 East Dunlap Avenue	Approximately 50 feet, east	2002 – 2009	No

Neither of these facilities was listed with registered USTs or on a database indicative of a release. Therefore, these facilities are not considered to be RECs to the subject property.

#### 4.1.3 Surrounding Area

The following properties within the appropriate ASTM search radii of the subject property were listed on the identified databases. The evaluation of the potential of these properties to environmentally affect the subject property was partially based on the groundwater flow direction of west-northwest. Therefore, sites located east-southeast of the subject property were considered to be upgradient.

#### 4.1.3.1 Federal Databases

No facilities with the applicable ASTM search radii were identified on the Federal databases reviewed by EDR.

#### 4.1.3.2 Arizona State Databases

#### LUST

According to EDR, the following 12 LUST sites were identified within ½ mile of the subject property.

Facility Name	Address	Distance Cardinal Direction	Hydrogeological Direction	Status	REC
Mitchell Electric Co. Inc.	324 East Caron Street	480 feet, northeast	Crossgradient	1 LUST closed	No
Haynes Performance Center	16 East Dunlap Avenue	0.18 mile, west- northwest	Downgradient	1 LUST, closed	No
Sunnyslope Shell	8941 North Central Avenue	0.21 mile, west	Downgradient	1 LUST, closed	No
Lucky 7	8946 North 7 <sup>th</sup> Street	0.25 mile, east	Upgradient	1 LUST, closed	No
Gas & Energy	8722 North 7 <sup>th</sup> Street	0.3 mile, southeast	Upgradient	1 LUST, closed	No
City of Phoenix – Fire Station #7	403 East Hatcher Road	0.3 mile, north- northeast	Crossgradient	1 LUST, closed	No
Auto Workshoppe	9324 North Central Avenue	0.33 mile, northwest	Downgradient	1 LUST, closed	No
Sunnyslope High School	35 West Dunlap Avenue	0.35 mile, west	Downgradient	1 LUST, closed	No
Mears Air Conditioning & Heating	743 East Dunlap Avenue	0.36 mile, east	Upgradient	1 LUST, closed	No
Nico Classico	9123 North Cave Creek Road	0.36 mile, east- northeast	Upgradient	2 LUSTs, both closed	No

Facility Name	Address	Distance Cardinal Direction	Hydrogeological Direction	Status	REC
J&E Auto Service	8615 North 7 <sup>th</sup> Street	0.37 mile, southeast	Upgradient	1 LUST, closed	No
Arco #5257	8501 North 7 <sup>th</sup> Street	0.44 mile, southeast	Upgradient	4 LUSTs, all closed	No

The above-listed LUST incidents have been closed without reported groundwater impacts. Closed sites do not require further remediation at this time. None of these facilities were located adjacent to the subject property. Therefore, it is AECOM's opinion that it is unlikely that these facilities have environmentally affected the subject property and are not considered to be RECs to the site.

#### 4.1.4 Vapor Encroachment

The release of vapors from contaminated soil or groundwater on or near the subject property may be considered a REC to the subject property. AECOM reviewed the environmental database report, regulatory agency-provided information, physical setting information, historical information and findings from the site reconnaissance to identify potential vapor encroachment conditions (VECs) onto the subject property. No potential sources of VECs were identified on the subject property during the site reconnaissance, in the environmental database search report or in historical records reviewed.

AECOM's review of potential off-site sources of vapor encroachment conditions included a review of the environmental database search report for known or suspected contaminated sites in an area of concern of  $1/_{10}$  mile for petroleum hydrocarbon-impacted sites and  $1/_3$  mile for sources of additional contaminants of concern (i.e., volatile organic compounds [VOCs]). In addition, sites identified within 1 mile of and upgradient to the subject property with respect to groundwater flow direction were reviewed. Sites identified within these search distances were further evaluated as potential vapor encroachment sources based on the media impacted (i.e., soils or groundwater), depth to groundwater (see Section 4.3.3) and regulatory status (i.e., active, remediation ongoing or closed). Based on available data, sites determined to have the potential for contaminants to migrate to within 100 feet of the subject property for non-petroleum contaminants and 30 feet of the subject property for petroleum contaminants were considered to be potential vapor encroachment conditions to the subject property, and therefore RECs. Based on a review of the available data, no potential VECs from off-site sources were identified.

#### 4.1.5 Unmapped Sites

AECOM reviewed the Orphan List Sites, which are sites that have not been geocoded based on lack of sufficient data regarding their exact location within the general area. Site observations and review of the address information provided by EDR revealed that none of the eight Orphan sites are located within the ASTM radii of the subject property. Therefore they are not likely to

have any environmental impact on the subject property and are not considered RECs to the site.

#### 4.2 ADDITIONAL ENVIRONMENTAL RECORD SOURCES

During the performance of an ESA, federal, state, and local regulatory agencies having jurisdiction over the subject property are contacted to determine the following information: the status of relevant environmental permits; whether there have been any violations, or other similar correspondence from such agencies; whether any corrective action or remediation is planned, currently taking place, or has been completed at the subject property; whether there have been any reported violations or complaints that the subject property is not in compliance with environmental laws, regulations, or standards, and whether the subject property is under investigation for such non-compliance; whether the subject property is listed on any of the regulatory agencies regarding the subject property or surrounding sites of concern. Copies of the records indicated below are included in Appendix D.

#### 4.2.1 Building Records

On February 23, 2016, AECOM requested building records on file with the City of Phoenix PDD for the subject property address. In addition, on February 26, 2016, AECOM reviewed records available on the City of Phoenix PDD website. A building permit dated 1959 for a masonry residence was identified. Addition records identified included mobile home permits, zoning hearings, inspections, remodel, fence, plumbing and electrical permits dated between 1959 and 2011. In addition, a complaint dated 2004 for unsafe electrical, structural and plumbing was identified.

#### 4.2.2 Fire Department Records

On February 23, 2016, AECOM contacted the City of Phoenix Fire Department, Fire Prevention Division regarding a file search request for USTs or hazardous material incidents for the subject property address. No records pertaining to USTs, hazardous materials or complaints were identified. Records provided included a property identification report dated 1977 and a property inspection report dated 1979, with no violations noted, for the Plaza Trailer Park.

#### 4.2.3 MCESD

On February 28, 2016, AECOM reviewed the MCESD online database for the subject property address. Records identified included records of fees paid for the trailer park between 1995 and 2015 and a complaint of stagnant/standing water that was breeding ground for mosquitos. No further details were provided; however, the complaint was listed as closed out.

### 4.2.4 ADWR

On February 23, 2016, AECOM reviewed the online well database provided by ADWR. According to ADWR records, no wells were registered to the subject property or the adjacent properties. Nine wells were identified within ½ mile of the subject property. These wells included two heat pump wells, four cathodic protection wells, one monitoring well and two wells listed as not drilled or not used.

#### 4.3 PHYSICAL SETTING SOURCES

Physical characteristics including topography, geology, hydrogeology, and soils were evaluated based on site observations, published literature, and maps.

#### 4.3.1 Topography

According to the United States Geological Survey (USGS) Sunnyslope, Arizona, 2014 7.5minute topographic quadrangle map (USGS, 2014), the subject property is located in the northeast quarter of Section 32, Township 3 North, Range 3 East, of the Gila and Salt River Baseline and Meridian. The elevation of the subject property is approximately 1,260 feet above mean sea level. The general direction of surface water flow at the subject property is to the southwest.

#### 4.3.2 Geology

The subject property is located within the West Salt River Valley subbasin of the Phoenix Active Management Area (AMA). The Phoenix AMA is also known as the Salt River Valley. The Salt River Valley is a broad alluvial basin within the Basin and Range physiographic province. The basin is almost completely surrounded by mountains composed primarily of volcanic, granitic, metamorphic and sedimentary rocks. The valley floor is underlain by unconsolidated to semiconsolidated basin-fill sediments, which consist mainly of clay, silt, sand and gravel. The primary source of groundwater in the Salt River Valley is the basin-fill sediments, which are divided into three distinct water bearing units: the upper alluvial unit, the middle fine-grained unit and the lower conglomerate unit. In the West Salt River Valley subbasin, groundwater is generally obtained evenly between the upper, middle and lower basin fill. The main waterbearing unit ranges in thickness from a few tens of feet near the mountains to more than 1,200 feet in the central part of the area. (Cooley, 1973 and ADWR, 2010)

#### 4.3.3 Hydrogeology

The depth to groundwater in the area of the subject property is approximately 240 feet below ground surface (Rascona, 2005). The general direction of groundwater flow in the vicinity of the subject property appears to be west-northwest.

15

#### 4.3.4 Soils

AECOM reviewed readily available reference material providing soil types for Maricopa County. According to the U.S. Department of Agriculture Soil Conservation Service, naturally occurring on-site surface soil consists primarily of Rillito sandy loam, 0 to 1 percent slopes (USDA, 2016). These well drained soils formed of mixed alluvium on alluvial fans and stream terraces. A typical soil profile consists of sandy loam from 0 to 10 inches below ground surface (bgs) and gravelly loam from 10 to 75 inches bgs. It should be noted that soil types indicated in any preprinted reference may vary from those actually encountered on a site if mixing, grading, excavation, or fill deposition has occurred.

#### 4.3.5 Flood Zones

According to the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map (FIRM), the subject property is located outside the boundaries of the 100-year floodplain (indicated as Zone X [shaded] on the map). Zone X (shaded) is defined as "Areas of 0.2% annual chance flood; areas of 1% annual chance flood with average depths of less than 1 foot or with drainage areas less than 1 square mile; and areas protected by levees from 1% annual chance flood." (FEMA, 2013)

#### 4.3.6 Potential Waterways of the U.S.

According to our site reconnaissance and our review of the topographic map, the site is not located within ½ mile of any potential waterways of the U.S. The Arizona Canal is located approximately ¼ mile southwest of the subject property.

#### 4.4 HISTORICAL USE OF SITE AND ADJOINING PROPERTIES

Information regarding past site land use was obtained by reviewing historical aerial photographs, historical title reports, property tax assessment records, topographic and historical fire insurance maps (Sanborns), and through personal interviews. These documents were reviewed to obtain information regarding obvious historical land use from the present and back to the property's first developed use, or back to 1940, whichever is earlier. Data failures are defined as a failure to meet the historical research objective even after reviewing the standard historical sources that are reasonably ascertainable and likely useful. A data failure is a type of data gap. The following table summarizes the standard historical sources reviewed, the applicable dates, and any data failures.

Historical Data Type	Source	Applicable Dates	Data Failures
Title Report	Allands	1927 – current	No

Historical Data Type	Source	Applicable Dates	Data Failures
City Directories	Phoenix Public Library, Arizona Room, Burton Barr Branch	1940, 1945, 1950, 1955, 1960, 1965, 1970, 1971, 1974, 1976, 1980, 1981, 1985, 1990, 1995, 2000, 2004, 2009 and 2014	Yes
Aerial Photographs	FCDMC online	1949, 1953, 1959, 1961-1962, 1969, 1979, 1982, 1986, 1991, 1993, 1996, 1998, 2000, 2001, 2002, 2003, 2004, 2006 through 2013	No
Aerial Photographs	City of Phoenix Public Works Dept.	1961, 1964, 1971, 1975, 1978, 1982, 1986, 1991, 1995 and 1999	No
Topographic Map	USGS	1965, 1973, 1982, 2011 and 2014	No

#### 4.4.1 Aerial Photographs

The aerial photograph review was primarily conducted to verify some historical information (e.g., age of development) and to help identify the likelihood of past uses that may have led to RECs in connection with the subject property. Major features such as structures, parking areas, and large ASTs may be readily distinguishable on aerial photographs. However, not all observable features may be positively identified as property features, changes in conditions, or potential environmental conditions.

Historical aerial photographs were obtained from the City of Phoenix Public Works Department and the Flood Control District of Maricopa County's website (http://www.fcd.maricopa.gov). A summary of our review of the aerial photographs for the site is as follows:

Year(s)*	Subject Property	Probable Use (if known)			
1949 – 1953	The subject property appeared to consist of two buildings on the northeast portion and eight small structures, likely vehicles or trailers, surrounding the buildings. The remainder of the subject property appeared to be vacant land. An unpaved road was visible in the 3 <sup>rd</sup> Street alignment to the east.	Trailer park and vacant			
1959	Numerous additional trailers were visible on the subject property and the entire subject property appeared to be used as a trailer park. 3 <sup>rd</sup> Street has been paved.	Trailer park			
1961 – 2013	The two buildings on the subject property appeared to have been reconfigured into one L-shaped building, similar to the current configuration.	Trailer park			
* See Secti	* See Section 4.4 summary table for specific aerial photograph years reviewed.				

AECOM observed no obvious features on the aerial photographs that would appear to represent a REC to the subject property.

#### Adjacent Property Probable Use

Year*	North	South	East	West
1949 – 1953	Commercial, residential and vacant	Residential	Residential and vacant	Vacant land and residential
1959	Commercial	Residential	Residential	Residential

Year*	North	South	East	West
1961 – 2003	Commercial	Residential	Commercial and residential	Residential and commercial
2004 – 2013	Commercial	Residential	Commercial	Residential and commercial

\* See Section 4.4 summary table for specific aerial photograph years reviewed.

Numerous vehicles were visible on an adjacent property to the west on the 1982 aerial photograph and this property appeared to be a possible automotive service or sales facility. This property was identified as a historical auto station in the environmental database search and is further discussed in Section 4.1.2. AECOM observed no other obvious features in the aerial photographs of adjacent properties that appear to present a REC to the subject property.

#### 4.4.2 Historical Maps

AECOM reviewed the following USGS topographic maps for the subject property and vicinity: Sunnyslope, Arizona (1965); Sunnyslope, Arizona (1965, photorevised 1973); Sunnyslope, Arizona (1965, photorevised 1982), Sunnyslope, Arizona (2011) and Sunnyslope, Arizona (2013). No structures, water wells, landfills, pits, or other anomalies were depicted on the subject property in any of the maps reviewed; however, the subject property and surrounding area were depicted as within a developed urban area on the 1965 through 1982 maps. The 2011 and 2014 maps included orthoimages, which depicted a trailer park on the subject property, similar to current conditions.

No Sanborn Fire Insurance Rate Map coverage for the subject property area was identified.

#### 4.4.3 Historical Title Report

AECOM was requested by the City of Phoenix to obtain a historical title report for the subject property. Allands of Goodyear, Arizona prepared the historical title report. According to the title report, the subject property parcel (APN 160-50-079) has been owned by Scot E. and Lida K. Martin, general members of the Scot E. Martin and Lida K. Martin Family Limited Partnership, Number One since 1994. According to the title report, the following persons or entities have owned or leased the subject property parcel since 1927.

Subject Property Owner/Lease	Year(s)
Mary and W.J. Rifley	Pre-1927
Mary Mahony (aka Mary Woodruff)	1927 – 1948
Ed and Grace Cornish	1937 – 1947
Charles and Gladys Ring	1947
Preston and Pauline Dooley	1948 – 1950
Charles and Gladys Ring	1950 – 1959

Subject Property Owner/Lease	Year(s)
Henry and Helen Kuether (aka Helen Jorgensen)	1959 – 1967
Melvin and Nona Laabs	1967 – 1984
Frederick and Anne Kindler	1984 – 1994
Spence Investors, Inc.	1994
Web Service Company, Inc. (lease)	1994
Scot and Lida Martin	1994
Scot and Lida Martin, general members of the Scot E. Martin and Lida K. Martin Family Limited Partnership, Number One	1999 – present
Automatic Laundry Company, Ltd. (lease)	2004

According to the records, the lease to Automatic Laundry Company, Ltd. was to operate a laundry room on the subject property. The laundry room was observed to be a coin-operated laundry with typical residential-sized appliances. No indications that drycleaning operations occurred on the subject property were identified. There are no environmental liens, Voluntary Environmental Mitigation Use Restrictions (VEMURs), DEURs, or other environmental activity or use limitations identified by the title report. Previous owners are not considered an environmental concern to the subject property. A copy of the title report is included in Appendix E.

#### 4.4.4 City Directories

AECOM reviewed city directories for the address associated with the subject property at the City of Phoenix Public Library. The following is a summary of the listings identified for the site address.

Year(s)*	1961 West Dunlap Avenue	Probable Use (if known)		
1940 – 1945	No listing	-		
1950 – 2014 Trailer park with various residential listings Residential				
* See Section 4.4 summary table for specific years reviewed.				

For the vicinity of the subject property, residential and commercial listings were identified along North 3<sup>rd</sup> Street and East Dunlap Avenue beginning in the 1950 directory and along North 2<sup>nd</sup> Way beginning on the 1970 directory. Businesses adjacent to the subject property and potentially associated with chemical use and storage are summarized in the following table.

Year(s)*	Address	Listing
1955	8990 North 3 <sup>rd</sup> Street	Sunnyslope Laundry-All
1970	8935 North 2 <sup>nd</sup> Way	Sunnyslope Taxi Service

Year(s)*	Address	Listing		
1971 – 2014	301 East Dunlap Avenue	Tire and automotive service (under various names)		
1990 – 1995	8935 North 2 <sup>nd</sup> Way	Graphic Art Service		
* See Section 4.4 summary table for specific years reviewed				

See Section 4.4 summary table for specific years reviewed.

As discussed in Section 4.1.2, none of these adjacent facilities were identified with registered USTs, as generators of hazardous wastes or on a database indicative of a release. In addition, the Sunnyslope Laundry-All facility was not identified on ADEQ's list of drycleaners. Therefore, these facilities are not considered to be RECs to the subject property.

#### 4.4.5 Archaeological Resources

On February 24, 2016, AECOM requested an archaeology assessment from the City of Phoenix Archaeology Section of the Pueblo Grande Museum. According to Laurene Montero of the Archaeology Section, no known archaeology sites are located within the project area and no further archaeology work is necessary for this project. However, if archaeological materials are encountered during construction, all ground-disturbing activities must cease within 10 meters of the discovery and the City of Phoenix Archaeology Office must be notified immediately and allowed time to properly assess the materials. A copy of the Archaeology Assessment Result is included in Appendix F.

#### 4.4.6 Previous Assessment

No previous assessments for the subject property were provided.

#### 4.4.7 Data Failures

Historical information indicates that the subject property was developed as a trailer park prior to 1949. No definitive historical use prior to 1940 was identified. Because the subject property appeared to be a trailer park and vacant land at that time, it is AECOM's opinion that no significant data failures that would warrant further investigation were noted during our assessment.

# 5.0 SITE RECONNAISSANCE

AECOM's site reconnaissance was conducted to observe existing operations and potential environmental conditions, including: chemical storage and disposal areas; evidence of stressed vegetation, disturbed topography, soil and surficial staining; evidence of underground/ aboveground storage tanks; and the presence of polychlorinated biphenyl (PCB)-containing equipment. Site photographs are included as Appendix G.

20

#### 5.1 METHODOLOGY AND LIMITING CONDITIONS

Ms. Burrus and Mr. Kiviko conducted a reconnaissance of the site on February 23, 2016 to observe and document present site conditions. AECOM was escorted during the site reconnaissance by the current property owners, Lida and Scot Martin, and City of Phoenix representative Jesse Garcia. The interiors of the occupied residences (mobile homes and two unit rental) on the subject property were not accessed; however, the interiors of the unoccupied mobile homes were viewed from the windows. All common areas and the interior of the maintenance buildings were physically inspected. Based on their uses, the lack of access to the occupied residences is not considered to be a limiting condition for this assessment. No other conditions were encountered that would limit AECOM's ability to make appropriate conclusions regarding the environmental integrity of the subject property.

#### 5.2 GENERAL SITE SETTING

The subject property is an approximately 31,250-square foot trailer park and is located at 8930 North 3<sup>rd</sup> Street (see Figure 2 and Site Photographs 1 through 13). The approximately 1,336-square-foot building was constructed in approximately 1959 and is of slab-on-grade, masonry brick and wood frame construction. The building includes a two-rental unit, a laundry room and restroom. A separate maintenance shed is located southwest of the building and a second maintenance building, reportedly a former bath house, was located south of the maintenance shed. The trailer park includes approximately 24 mobile home pads, ten of which were occupied. The buildings and mobile home pads are surrounded by asphalt parking and landscaped areas. Four entrance driveways are located along 3<sup>rd</sup> Street on the eastern side of the subject property.

The subject property is bordered by Graze Deals used car sales (8990 North 3<sup>rd</sup> Street) and Juliobertos Mexican Foods (229 East Dunlap Avenue) to the north; single and multi-family residences to the south; 3<sup>rd</sup> Street, Firestone/Central Car Care (301 East Dunlap Avenue), City of Phoenix Sunnyslope Transit Center (8927 North 3<sup>rd</sup> Street) and a vacant lot to the east; and an alley, office buildings (8927 North 2<sup>nd</sup> Way and 8935 North 2<sup>nd</sup> Way) and single -family residences to the west (see Figure 3 and Site Photographs 14 through 18).

#### 5.3 HAZARDOUS SUBSTANCES AND WASTES

Typical residential-style cleaning products, automotive and building maintenance chemicals in retail-sized containers were observed on the subject property. In addition, residential-sized propane cylinders were observed adjacent to several of the mobile homes. An approximately 5-gallon bucket containing an oily substance, likely waste oil from an automobile, was observed adjacent to one of the mobile homes. In addition, oily staining was observed on the paved parking and drive areas of the subject property. The oily container and oily staining is considered to be a *de minimis* condition to the subject property.

# 5.4 UNDERGROUND STORAGE TANKS (UST) AND ABOVEGROUND STORAGE TANKS (AST)

No indications of current or past presence of above/underground petroleum-type storage tanks (i.e. piping, vent pipes, patched surfaces) were observed on or adjacent to the subject property during our site reconnaissance.

#### 5.5 PCB-CONTAINING EQUIPMENT

One pole-mounted electrical transformer was observed within the 3<sup>rd</sup> Street right-of-way to the east and two pole-mounted transformers were observed within the alley to the west of the subject property. The transformers are owned and maintained by Arizona Public Service (APS). Although the PCB-content was not noted, these transformers appeared to be in good condition, with no staining or leaking observed.

#### 5.6 SOLID WASTE

Solid waste is collected by Waste Management and consists of typical residential trash. AECOM observed one dumpster in the parking area on the northwest portion of the subject property.

#### 5.7 UTILITY AND SANITARY SEWER SYSTEMS INFORMATION

Utility	Company Name	Notes
Water	City of Phoenix	1981 (line along 3 <sup>rd</sup> Street)
		No date listed (line along alley west of subject property)
Sewer	City of Phoenix	1962 (line along alley west of subject property)
Electric	APS	-
Natural Gas	Southwest Gas	Although an underground natural gas pipeline marker was observed on the subject property, no connections to the subject property buildings or mobile homes were noted.

The following utility companies service the subject property and/or area.

Historical information indicates that the subject property was developed prior to the installation of municipal water and/or sewer services. Therefore, it is possible the subject property was served by an on-site septic system and groundwater well or community water system. Because the historical use of the subject property has been residential, a possible on-site septic system and/or groundwater well are not considered to be RECs to the subject property.

#### 5.8 WATER WELLS AND MONITORING WELLS

No groundwater supply or monitoring wells were observed on or adjacent to the subject property during our site reconnaissance.

#### 5.9 STORMWATER DRAINAGE, DRYWELLS, AND WASTEWATER

Drywells are typically constructed on commercially-developed properties to collect rainwater surface runoff and, therefore, have the potential to introduce contaminants into the subsurface. No drywells were observed on the subject property. Stormwater appears to pool onsite or flow towards the adjacent 3<sup>rd</sup> Street right-of-way.

Industrial wastewater does not appear to be generated on the subject property.

#### 5.10 REFRIGERANT-CONTAINING APPLIANCES

Typical residential refrigerators and freezers were observed on the subject property. In addition, the two-unit rental building is temperature controlled via a roof-top air conditioning unit and window and roof-top air conditioning units were observed on several of the mobile homes. No other refrigerant-containing appliances were observed on the subject property during the site reconnaissance.

#### 5.11 DRAINS AND SUMPS

Typical residential sanitary drains were observed within the two-unit rental/laundry building and mobile homes. In addition, a drain was observed within the maintenance building (former bath house). These drains are reportedly connected to the municipal sanitary sewer system. No other drains or sumps were observed on the subject property during the site reconnaissance.

#### 5.12 PITS, PONDS, OR LAGOONS

No evidence of pits, ponds, or lagoons was observed on the subject property during our site reconnaissance.

#### 5.13 OTHER POTENTIAL AREAS OF CONCERN

No other physical evidence of contamination, such as staining or unusual odors, was observed on the subject property during our site reconnaissance.

### 6.0 INTERVIEWS

AECOM interviewed the following individuals during the course of this assessment. Findings from these interviews are included in the sections noted.

Role	Name	Company	Method	Section
Current Owner Representative	Lida and Scot Martin	-	In person	6.1
Previous Owner / Occupant	See below.		-	6.2

#### 6.1 CURRENT OWNER/REPRESENTATIVE

On February 23, 2016, AECOM interviewed Lida and Scot Martin, the current owners of the subject property. Mr. and Mrs. Martin provided the following information.

- They have owned the subject property since 1989.
- The subject property was a trailer park when they purchased it and had been a tuberculosis sanatorium with a bath house in the past.
- They knew of no spills, incidents, environmental liens or other environmental issues related to the subject property.

#### 6.2 PREVIOUS OWNER

AECOM attempted to locate previous owners indicated on the title report using the online directory, Superpages.com and the Arizona Corporation Commission (ACC) website. The information found is summarized in the following table.

Previous Owner Name	Years*	Result
Mary and W.J. Rifley	Pre-1927	No listings were identified.
Mary Mahony (aka Mary Woodruff)	1927 – 1948	No listing was identified.
Ed and Grace Cornish	1937 – 1947	No listings were identified.
Charles and Gladys Ring	1947, 1950 – 1959	No listing for Charles H. Ring was identified. One listing for Gladys Ring was identified. 2/29/16 – An automated message at the phone number provided indicated the voicemailbox has not been set up and no message could be left.
Preston and Pauline Dooley	1948 – 1950	No listings were identified.
Henry and Helen Kuether (aka Helen Jorgensen)	1959 – 1967	Henry Kuether is deceased according to the title report. No listing for Helen Kuether or Helen Jorgensen was identified.
Melvin and Nona Laabs	1967 – 1984	No listings were identified.
Frederick and Anne Kindler	1984 – 1994	No listings were identified.
Spence Investors, Inc.	1994	No listings were identified. According to the ACC website, the corporation was dissolved by 2001.
* According to title report, years associated with subject property.		

# 7.0 FINDINGS AND OPINIONS

AECOM has performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E1527-13 on the trailer park property located at 8930 North 3rd Street in Phoenix, Maricopa County, Arizona. Any exceptions to, or deletions from, this practice are described in Sections 1.3 and 1.5 of this report. This assessment has revealed no evidence of RECs in connection with the subject property. AECOM's findings and opinions are presented below.

#### 7.1 RECOGNIZED ENVIRONMENTAL CONDITIONS

No RECs, controlled RECs or historical RECs were identified for the subject property.

#### 7.2 *DE MINIMIS* CONDITION

Areas of oily staining were observed on the asphalt-paved areas of the subject property and an approximately 5-gallon container of an oily substance (likely waste oil) was observed adjacent to one of the mobile homes. AECOM considers this a *de minimis* condition.

# 8.0 CONCLUSIONS AND RECOMMENDATIONS

Based on the scope of services performed for this Phase I ESA, AECOM recommends no further assessment of the subject property at this time.

# **10.0 PREPARER SIGNATURES AND QUALIFICATIONS**

This section includes qualification statements of the environmental professionals responsible for conducting the ESA and preparing this report.

The site reconnaissance and report review were performed by Ms. Marianne Burrus and Mr. Matt Kiviko. The data review and report writing were performed by Ms. Elizabeth Parker. All project personnel are from the AECOM Corporation office in Phoenix, Arizona.

Ms. Parker and Ms. Burrus declare that, to the best of their professional knowledge and belief, they meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312.

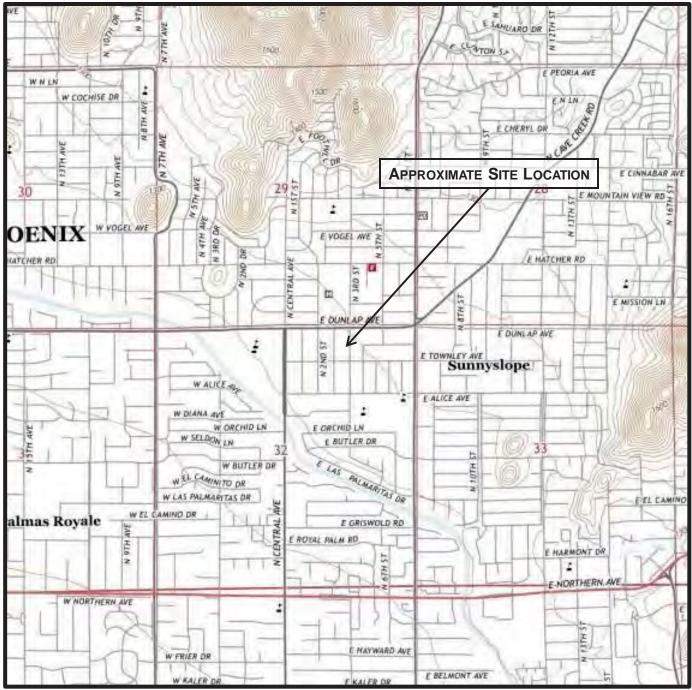

They have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. They have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

## Registrations

AHERA Asbestos Management Planner, EPA, Arizona AHERA Asbestos Building Inspector, EPA, Arizona

## Years of Experience

With AECOM/URS: 17 With Other Firms: 13

## **Specialized Training**

ASTM Assessment of Vapor Intrusion into Structures on Property Involved in Real Estate Transactions Training, 2008 Ms. Burrus is the Due Diligence Team Leader for the AECOM Phoenix office. Marianne Burrus has more than 30 years of experience in the environmental industry with emphasis in Due Diligence and Quality Assurance/ Quality Control (QA/QC) Programs. Ms. Burrus performs all aspects of Phase I Environmental Site Assessments (ESA), Phase II ESAs, and asbestos projects for the private and commercial sector, as well as city, county, and state agencies. Her responsibilities include project management, site reconnaissance, sample collection, historical records review, evaluating adjacent properties for potential impact to site conditions, and report preparation. Ms. Burrus is an Environmental Professional, as defined by ASTM Standard E 1527-05 and has performed assessments using this standard.

## **Project Experience**

Project Manager, Various Mixed-Use Property Projects, Phase I ESA, Phoenix and Maricopa County, Arizona, City of Phoenix: As project/program manager Ms. Burrus has been providing due diligence services to the City for 10 years and has performed over 100 ESAs. Major Phase I projects completed include:

- McMullen Valley Water Conservation District Property: Task order involved site with approximately 13,000 acres of agricultural land in La Paz County and areas of current and former agricultural farm fields and orchards, undeveloped desert land, current and former residences, a current farm yard and maintenance area, numerous former residences and farm yards/maintenance areas, former possible crop dusting air strips, and a former manganese ore facility
- Light Rail Transit Project: Over 50 "partial take" properties, right-of-ways, and temporary construction easements designated for use during the development of the City of Phoenix Light Rail project. Project areas included industrial, commercial, and residential parcels.
- Sonoran Preserve Land Acquisition Program: Approximately 4,300 acres of land located in north Phoenix. The site included: undeveloped native desert land; land in and surrounding the Pioneer Arizona Living History Museum, a wastewater treatment facility, an area used for illegal target practice, and a communication tower.
- Automated Train System Project: Industrial facilities located within the area north of Sky Harbor International Airport.
- Community Noise Reduction Program (CNRP): Various residential properties acquired by the City under its CNRP.

**Project Manager, Phase I ESAs and Phase II Site Investigations, Pueblo of Zuni, New Mexico, New Mexico Environment Department (NMED):** Managed projects for NMED as part of its Brownfields Program funded by EPA Region 6. Sites have included commercial properties and former automobile maintenance facilities, body shops, and gas stations. The purpose of these Phase II investigations was to oversee the removal of underground features (including UST, hydraulic equipment, distribution lines and associated piping) and to evaluate the nature and extent of petroleum impacts that may exist.

**Project Manager, Transaction Screens, Phase I ESAs, Phase II ESAs, Asbestos Surveys and Compliance Services, throughout the United States, Albertson's LLC:** As project manager, Ms. Burrus has completed or overseen the completion of more than 100 assessments for a major grocery store chain located throughout the United States. Phase II ESAs have included soil, soil gas, and groundwater investigations for the assessment of underground features (including USTs), dry cleaners, and other historical uses of the subject and adjoining properties.

**Project Manager, Phase I ESAs and Asbestos Surveys, Buckeye, Arizona, W.C. Scoutten:** Managed project for W.C. Scoutten and under direction of the Town of Buckeye requested to conduct Phase I ESAs and asbestos surveys for various redevelopment and expansion projects. These assessments included a salvage yard, a previous automobile dealership, a high school, a cotton gin, and various commercial properties.

Project Manager, Metro North Corporate Park, Phase I ESA, Phoenix, Arizona, Dimension Financial Realty Investment, Inc. (DFRI): Managed several Phase I ESAs for DFRI in anticipation of the sale and redevelopment of land within the former Deer Valley Computer Park Water Quality Assurance Revolving Fund area. These assessments included areas with environmental use restrictions. Along with the standard Phase I ESA scope of services, these investigations included detailed review and interpretation of historical information and agency documentation in anticipation of removing the property's use restriction.

Task Leader, Hazardous Material (HazMat) Studies, Central Mesa and Tempe South Corridors, Arizona, Valley Metro: Conducted HazMat studies of numerous alternatives being considered for various public transit corridors. These studies included a review of data to locate potential areas of environmental concerns, including recorded releases and enforcement actions.

**Task Leader, Interstse-10 – Tangerine Road to Ina Road, HazMat Studies, ADOT:** As part of the Design Concept Report (DCR) and Environmental Assessment (EA) for the proposed improvements to this segment of I-10,URS has conducted HazMat study. This study included performing a screening level assessment of the study area and identifying potential environmental concerns associated with individual properties within and adjacent to the study area.

**Team Leader, Matthew Hanson Hope VI Redevelopment Project, Asbestos Survey and Predemolition Oversight, Phoenix, Arizona, MBA Development Corporation, Inc.:** Conducted an asbestos survey of 372 public housing units and 21 single-family homes. Pre-demolition oversight activities included; abatement oversight, hazardous materials removal, and preparation of demolition clearance report. Project conducted under funding from United States Department of Housing and Human Development.

**Project Manager, Chandler Municipal Airport, Phase I EBS, Chandler, Arizona, City of Chandler:** The Phase I EBS documented the current and historical property use and past and present potential environmental concerns. The scope of services included a site reconnaissance and review of current and past site uses through a review of historical information and an extensive interview process.

**Project Manager, Spur Cross Ranch, Phase I ESA, Cave Creek, Arizona, Arizona State Parks:** Conducted extensive Phase I ESA on 2,200 acres of native land with a series of mountains, ridges, washes, and canyons. Although the site was primarily desert land, an abandoned mine (from the late-1800s) was identified on site. Ultimately, our investigations were used for acquisition of the property for development as a state park.

# Elizabeth Parker Environmental Scientist

## Education

BSA, Environmental Protection, West Virginia University, 1999

## Registrations

AHERA Asbestos Building Inspector 40-Hour HAZWOPER EPA Method 9 Visible Emissions

Years of Experience

With AECOM/URS: 6 With Other Firms: 3 Ms. Parker is an Environmental Scientist with over nine years of project experience in Phase I, Phase II, and Phase III Environmental Site Assessments (ESAs).

Ms. Parker has performed all aspects of Phase I ESAs, including site reconnaissance, database and regulatory agency records review, historical research, sampling, remediation coordination and oversight, data evaluation, and report writing for various clients, including municipalities, state, and county agencies, corporations, and individuals. Ms. Parker has performed Phase I ESAs on various property types, including light and heavy industrial facilities, single and multi-tenant commercial properties, single and multi-family residential properties, agricultural land, vacant and undeveloped land.

Ms. Parker has performed Phase I ESAs in support of Brownfields projects. In addition to Phase I ESAs, Ms. Parker has performed transaction screens using ASTM standard E1528-14; Tier I vapor encroachment screening using ASTM standard E2600-10; soil and groundwater sampling activities, data review and report writing in support of Phase II and III ESAs; Tier III risk assessments using the Johnson and Ettinger model; asbestos and lead-based paint surveys; radon surveys; and EPA Method 9 visible emissions observations.

Ms. Parker is an Environmental Professional as defined by ASTM Standard E1527-05 and has performed assessments using this standard.

## **Project Experience**

## **Due Diligence**

**Environmental Scientist, Phase I ESAs, City of Phoenix, 2008 - 2015:** Conducted Phase I ESAs on road rights-of-way, agricultural and vacant land, residential and commercial developments in various locations in the City of Phoenix and in unincorporated Maricopa and La Paz Counties. Projects included:

- **McMullen Valley Water Conservation District Property:** Approximately 13,000 acres of agricultural land in La Paz County. The site included: areas of current and former agricultural farm fields and orchards; undeveloped desert land; current and former residences; a current farm yard and maintenance area; numerous former residences and farm yards/maintenance areas; former possible crop dusting air strips; and a former manganese ore facility.
- Light Rail Transit Projects: "Partial take" properties, rights-of-way and temporary construction easements designated for use during the development of the City of Phoenix Light Rail project. Project areas included industrial, commercial, and residential parcels.
- Sonoran Preserve Land Acquisition Program: Privately-owned and State-owned areas of land located in north Phoenix. The sites included: undeveloped desert land; desert land crossed by Cave Creek and ephemeral washes, including former gravel mining operations; ranch land; and land in and surrounding the Pioneer Arizona Living History Museum.

Environmental Scientist, Phase I/II ESAs, New Mexico, New Mexico Environment Department (NMED), 2013 – 2014: Conducted Phase I/II ESAs on various properties as part of the Brownfields program. Phase I ESA projects included environmental records review, historical research and report writing on a former automotive dealership and service facility and a retail facility on privately owned and

tribal lands. Phase II ESA projects included data review and report writing for soil and groundwater sampling and underground storage tank removal projects on an airport property and a former gasoline station on tribal lands.

Environmental Scientist, Phase I ESA, Chandler, Arizona, Honeywell PMT Electronic Chemicals, 2013: Conducted a Phase I ESA on a bulk chemical storage and mixing facility for chemicals used in the electronics industry.

**Environmental Scientist, Phase I ESA, Chandler, Arizona, confidential client, 2012:** Conducted a Phase I ESA site inspection on a 6.77-acre site occupied by a manufacturer of various engine components, blades and vanes for the aerospace and defense industry.

Environmental Scientist, Phase I ESAs and Transaction Screens, various projects, various clients, **2008 - 2015:** Conducted Phase I ESAs and transaction screens on various properties throughout Arizona and New Mexico. Projects included site reconnaissance, environmental records review, historical research and report writing on vacant and agricultural land, residences, medical buildings, retail stores, offices, automotive maintenance facilities, current and former gasoline stations, warehouse and manufacturing facilities.

Staff Scientist, various projects, various clients, 2005-2008, Geotechnical and Environmental Consultants, Inc.: Duties included research, evaluation and report writing for Phase I ESAs; coordination, supervision, sampling and report writing for Phase II and III ESAs; assistance with groundwater well sampling and drywell closures; proposal preparation; State Assurance Fund application preparation. Phase I ESAs performed on vacant land, road rights-of-way, residential, commercial and industrial developments throughout Arizona, as well as in Denver, Colorado and Albuquerque, New Mexico.

## Compliance

**Environmental Scientist, Compliance Audit, Phoenix, Arizona, Lighting Resources, 2013:** Conducted a compliance audit for a third party on a recycling facility for waste fluorescent lamps, ballasts, batteries, electronic waste and mercury devices, including polychlorinated biphenyl (PCB)-containing materials.

## **Asbestos Surveys**

**Environmental Scientist, Asbestos Survey, Gasoline Station, Mesa, Arizona, confidential client, 2015:** Conducted an asbestos survey for a pre-demolition project of an active gasoline station in Mesa, Arizona. Project included a survey to identify potential asbestos-containing materials, collecting samples of the materials for asbestos testing and field documentation.

Environmental Scientist, Asbestos Surveys, Krohn West, Phoenix, Arizona, MBA Development Corp., 2009: Assisted with the asbestos survey for the Krohn West pre-demolition project in Phoenix, Arizona. Project included surveys to identify potential asbestos-containing materials, collecting samples of the materials for asbestos testing and field documentation.

## **Radon Testing**

Environmental Scientist, Radon Testing, La Privada Apartments, Scottsdale, Arizona, La Privada PT, LLC, 2012: Conducted radon testing before and after installation of a radon mitigation system for La Privada Apartments in Scottsdale, Arizona. Project included placing and collecting radon test canisters in 193 ground-floor apartment units, analytical data review and report preparation.

Environmental Scientist, Radon Testing, Symphony Apartments, Phoenix, Arizona, MBA Development Corp., 2011: Conducted radon testing for Symphony Apartments (a.k.a. Krohn West) in Phoenix, Arizona. Project included placing and collecting radon test canisters in 14 apartment units, analytical data review and report preparation.

## **EPA Method 9 Visible Emissions Observations**

Environmental Scientist, various locations in Arizona, El Paso Natural Gas Company, 2012 – 2014: Conducted quarterly EPA Method 9 visible emissions and non-point source visible emissions observations on various natural gas compressor stations throughout Arizona.

**Environmental Scientist, El Mirage, Arizona, Pro Petroleum, 2010 - 2013:** Conducted quarterly EPA Method 9 visible emissions and non-point source visible emissions observations for a private petroleum company in El Mirage, Arizona.

# Public Works Department

Engineering and Architectural Services Division
Phase I ESA/AAI Requirements With the All Appropriate Inquiry (AAI, 40 CFR 312) requirements on conducting Phase I Environmental Site Assessments, the City of Phoenix, as the "user" of the assessment is responsible to acknowledge any information we may have related to the following issues, in order to qualify for landowner liability protections (LLPs). This information must be provided to the environmental professional for incorporation into the Phase I ESA report. Please check yes or no and provide any additional information you may have regarding the site. This form must be completed and signed prior to EAS issuance of the NTP.
(1) Environmental cleanup liens that are filed or recorded against the site (40 CFR 132.25). Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state, or loca
law? C Yes 💿 No If yes, please explain:
(2) Activity and land use limitations that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26). Are you aware of any activity use limitations (AULs), such as engineering controls, land use restrictions, or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?
○ Yes ● No If yes, please explain:
(3) Specialized knowledge or experience of the person/department requesting the Phase I ESA and seeking to qualify for the landowner liability protections (40 CFR 312.28). As the user of this ESA, do you have any specialized knowledge or experience related to the property or adjoining properties? Fo example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?
○ Yes ● No If yes, please explain:
(4) Relationship of the purchase price to the fair market value of the property, if it were not contaminated (40 CFR 312.29). Does the purchase price offered for this property reasonably reflect the fair market value of the property? If there is a difference between the purchase price and the fair market value, have you considered whether the lower purchase price is because contamination is known or believed to be at the property? Will purchase price be less than the appraised value?
○ Yes ● No If yes, please discuss:
<ul> <li>(5) Commonly known or reasonably ascertainable information about the property (40 CFR 312.30).</li> <li>Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user, <ul> <li>(a) Do you know the past uses of the property?</li> <li>(b) Do you know of specific chemicals that are present or once were present at the property?</li> <li>(c) Do you know of spills or other chemical releases that have taken place at the property?</li> <li>(d) Do you know of any environmental cleanups that have taken place or are ongoing at the property?</li> </ul> </li> </ul>
C Yes  No If yes, please discuss:
(6) The degree of obviousness of the presence or likely presence of contamination at the property and the ability to detect the contamination by appropriate investigation (40 CFR 312.31). As the user of this ESA, based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?
C Yes  No If yes, please explain:
Printed Name and Department Signature Uppli

#### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

#### STANDARD ENVIRONMENTAL RECORDS

#### Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/09/2015 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
CVS PHARMACY #1759	10 E DUNLAP AVE	WNW 1/8 - 1/4 (0.199 mi.)	E21	50

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 06/09/2015 has revealed that there are 4 RCRA-CESQG sites within approximately 0.25 miles of the target property.

#### State- and tribal - equivalent CERCLIS

SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Quality's ZipAcids database.

A review of the SHWS list, as provided by EDR, and dated 01/03/2000 has revealed that there is 1 SHWS site within approximately 1 mile of the target property.

#### State and tribal leaking storage tank lists

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Department of Environmental Quality's LUST File Listing by Zip Code.

A review of the LUST list, as provided by EDR, and dated 11/03/2015 has revealed that there are 12 LUST sites within approximately 0.5 miles of the target property.

### State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Quality's Arizona UST-DMS Facility and Tank Data Listing by City database.

A review of the UST list, as provided by EDR, and dated 11/03/2015 has revealed that there are 5 UST sites within approximately 0.25 miles of the target property.

#### State and tribal institutional control / engineering control registries

AZURITE: ADEQ maintains a repository listing sites remediated under programs administered by the department.

A review of the AZURITE list, as provided by EDR, and dated 10/07/2015 has revealed that there are 4 AZURITE sites within approximately 0.5 miles of the target property.

AUL: DEUR and VEMUR sites. DEUR: Declaration of Environmental Use Restriction. A restrictive land use covenant that is required when a property owner elects to use an institutional (i.e., administrative) control or engineering (i.e., physical) control as a means to meet remediation goals. The DEUR runs with and burdens the land, and requires maintenance of any institutional or engineering controls. VEMUR: Voluntary Environmental Mitigation Use Restriction. A restrictive land use covenant that, prior to July 18, 2000,was

required when a property owner elected to remediate the property to non-residential uses. Effective July 18, 2000, the DEUR replaced the VEMUR as a restrictive use covenant.

A review of the AUL list, as provided by EDR, and dated 10/07/2015 has revealed that there is 1 AUL site within approximately 0.5 miles of the target property.

#### ADDITIONAL ENVIRONMENTAL RECORDS

#### Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/09/2015 has revealed that there are 5 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

#### EDR HIGH RISK HISTORICAL RECORDS

#### EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 7 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

AZURITE (Arizona Unified Repository For Informational Tracking Of The Environment is the Arizona Department of Environmental Quality (ADEQ) database that is used for environmental enforcement and compliance reporting to the Permit and Compliance (PCS) system and to the Air Facility System Universal Interface (AFS-UI).

# **GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING**

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

# STANDARD ENVIRONMENTAL RECORDS

# Federal NPL site list

#### NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 10/30/2015 Date Data Arrived at EDR: 11/07/2015 Date Made Active in Reports: 01/04/2016 Number of Days to Update: 58 Source: EPA Telephone: N/A Last EDR Contact: 01/26/2016 Next Scheduled EDR Contact: 04/18/2016 Data Release Frequency: Quarterly

NPL Site Boundaries

EPA Region 10 Telephone 206-553-8665

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

# NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991 Date Data Arrived at EDR: 02/02/1994 Date Made Active in Reports: 03/30/1994 Number of Days to Update: 56 Source: EPA Telephone: 202-564-4267 Last EDR Contact: 08/15/2011 Next Scheduled EDR Contact: 11/28/2011 Data Release Frequency: No Update Planned

## Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 10/30/2015 Date Data Arrived at EDR: 11/07/2015 Date Made Active in Reports: 01/04/2016 Number of Days to Update: 58 Source: EPA Telephone: N/A Last EDR Contact: 01/26/2016 Next Scheduled EDR Contact: 04/18/2016 Data Release Frequency: Quarterly

# Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 03/26/2015	Source: Environmental Protection Agency
Date Data Arrived at EDR: 04/08/2015	Telephone: 703-603-8704
Date Made Active in Reports: 06/11/2015	Last EDR Contact: 01/06/2016
Number of Days to Update: 64	Next Scheduled EDR Contact: 04/18/2016
	Data Release Frequency: Varies

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/25/2013 Date Data Arrived at EDR: 11/11/2013 Date Made Active in Reports: 02/13/2014 Number of Days to Update: 94 Source: EPA Telephone: 703-412-9810 Last EDR Contact: 02/19/2016 Next Scheduled EDR Contact: 06/06/2016 Data Release Frequency: Quarterly

# Federal CERCLIS NFRAP site List

# CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 10/25/2013 Date Data Arrived at EDR: 11/11/2013 Date Made Active in Reports: 02/13/2014 Number of Days to Update: 94 Source: EPA Telephone: 703-412-9810 Last EDR Contact: 02/19/2016 Next Scheduled EDR Contact: 06/06/2016 Data Release Frequency: Quarterly

# Federal RCRA CORRACTS facilities list

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 06/09/2015 Date Data Arrived at EDR: 06/26/2015 Date Made Active in Reports: 09/16/2015 Number of Days to Update: 82 Source: EPA Telephone: 800-424-9346 Last EDR Contact: 12/18/2015 Next Scheduled EDR Contact: 04/11/2016 Data Release Frequency: Quarterly

# Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 06/09/2015 Date Data Arrived at EDR: 06/26/2015 Date Made Active in Reports: 09/16/2015 Number of Days to Update: 82 Source: Environmental Protection Agency Telephone: (415) 495-8895 Last EDR Contact: 12/18/2015 Next Scheduled EDR Contact: 04/11/2016 Data Release Frequency: Quarterly

# Federal RCRA generators list

# RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/09/2015 Date Data Arrived at EDR: 06/26/2015 Date Made Active in Reports: 09/16/2015 Number of Days to Update: 82 Source: Environmental Protection Agency Telephone: (415) 495-8895 Last EDR Contact: 12/18/2015 Next Scheduled EDR Contact: 04/11/2016 Data Release Frequency: Quarterly

# RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 06/09/2015 Date Data Arrived at EDR: 06/26/2015 Date Made Active in Reports: 09/16/2015 Number of Days to Update: 82 Source: Environmental Protection Agency Telephone: (415) 495-8895 Last EDR Contact: 12/18/2015 Next Scheduled EDR Contact: 04/11/2016 Data Release Frequency: Quarterly

# RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/09/2015 Date Data Arrived at EDR: 06/26/2015 Date Made Active in Reports: 09/16/2015 Number of Days to Update: 82 Source: Environmental Protection Agency Telephone: (415) 495-8895 Last EDR Contact: 12/18/2015 Next Scheduled EDR Contact: 04/11/2016 Data Release Frequency: Varies

#### Federal institutional controls / engineering controls registries

LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 05/28/2015Source: Department of the NavyDate Data Arrived at EDR: 05/29/2015Telephone: 843-820-7326Date Made Active in Reports: 06/11/2015Last EDR Contact: 02/16/2016Number of Days to Update: 13Next Scheduled EDR Contact: 05/30/2016Data Release Frequency: Varies

# US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 09/10/2015 Date Data Arrived at EDR: 09/11/2015 Date Made Active in Reports: 11/03/2015 Number of Days to Update: 53 Source: Environmental Protection Agency Telephone: 703-603-0695 Last EDR Contact: 11/24/2015 Next Scheduled EDR Contact: 03/14/2016 Data Release Frequency: Varies

# US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 09/10/2015 Date Data Arrived at EDR: 09/11/2015 Date Made Active in Reports: 11/03/2015 Number of Days to Update: 53 Source: Environmental Protection Agency Telephone: 703-603-0695 Last EDR Contact: 11/24/2015 Next Scheduled EDR Contact: 03/14/2016 Data Release Frequency: Varies

# Federal ERNS list

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 06/22/2015 Date Data Arrived at EDR: 06/26/2015 Date Made Active in Reports: 09/16/2015 Number of Days to Update: 82 Source: National Response Center, United States Coast Guard Telephone: 202-267-2180 Last EDR Contact: 12/29/2015 Next Scheduled EDR Contact: 04/11/2016 Data Release Frequency: Annually

# State- and tribal - equivalent NPL

#### AZ NPL: NPL Detail Listing

Detailed site information for NPL sites from the Arizona Department of Environmental Quality.

Date of Government Version: 09/30/2015	Source: Department of Environmental Quality
Date Data Arrived at EDR: 11/30/2015	Telephone: 602-771-4609

	Data Release Frequency: Varies

#### WQARF: Water Quality Assurance Revolving Fund Sites

Sites which may have an actual or potential impact upon the waters of the state, cause by hazardous substances. The WQARF program provides matching funds to political subdivisions and other state agencies for clean-up activities. Date of Government Version: 09/30/2015 Date Data Arrived at EDR: 11/30/2015 Date Made Active in Reports: 12/16/2015 Number of Days to Update: 16 Source: Department of Environmental Quality Telephone: 602-771-4360 Last EDR Contact: 02/22/2016 Next Scheduled EDR Contact: 06/06/2016 Data Release Frequency: Annually

# State- and tribal - equivalent CERCLIS

# SPL: Superfund Program List

The list is representative of the sites and potential sites within the jurisdiction of the Superfund Program Section. It is comprised of the following elements: 1) Water Quality Assurance Revolving Fund Registry Sites; 2) Potential WQARF Registry sites; 3) NPL sites; and 4) Department of Defense sites requiring SPS oversight.

Date of Government Version: 08/25/2004 Date Data Arrived at EDR: 12/03/2004 Date Made Active in Reports: 01/25/2005 Number of Days to Update: 53 Source: Department of Environmental Quality Telephone: 602-771-4360 Last EDR Contact: 02/01/2016 Next Scheduled EDR Contact: 05/16/2016 Data Release Frequency: Semi-Annually

# SHWS: ZipAcids List

The ACIDS list consists of more than 750 locations subject to investigation under the State Water Quality Assurance Revolving Fund (WQARF) and Federal CERCLA programs. The list is no longer updated by the state.

Date of Government Version: 01/03/2000 Date Data Arrived at EDR: 04/11/2000 Date Made Active in Reports: 05/16/2000 Number of Days to Update: 35 Source: Department of Environmental Quality Telephone: 602-771-4360 Last EDR Contact: 12/17/2015 Next Scheduled EDR Contact: 04/04/2016 Data Release Frequency: No Update Planned

# State and tribal landfill and/or solid waste disposal site lists

SWF/LF: Directory of Solid Waste Facilities

Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

### AZURITE: Remediation and DEUR/VEMUR Tracking System ADEQ maintains a repository listing sites remediated under programs administered by the department.

Date of Government Version: 10/07/2015 Date Data Arrived at EDR: 10/08/2015 Date Made Active in Reports: 11/03/2015 Number of Days to Update: 26 Source: Department of Environmental Quality Telephone: 602-771-4397 Last EDR Contact: 12/17/2015 Next Scheduled EDR Contact: 04/04/2016 Data Release Frequency: Quarterly

### AUL: DEUR Database

Activity and use limitations include both engineering controls and institutional controls. DEUR and VEMUR sites. DEUR: Declaration of Environmental Use Restriction. A restrictive land use covenant that is required when a property owner elects to use an institutional (i.e., administrative) control or engineering (i.e., physical) control as a means to meet remediation goals. The DEUR runs with and burdens the land, and requires maintenance of any institutional or engineering controls. VEMUR: Voluntary Environmental Mitigation Use Restriction. A restrictive land use covenant that, prior to July 18, 2000, was required when a property owner elected to remediate the property to non-residential uses. Effective July 18, 2000, the DEUR replaced the VEMUR as a restrictive use covenant.

Date of Government Version: 10/07/2015 Date Data Arrived at EDR: 10/08/2015 Date Made Active in Reports: 11/03/2015 Number of Days to Update: 26 Source: Department of Environmental Quality Telephone: 602-771-4397 Last EDR Contact: 12/17/2015 Next Scheduled EDR Contact: 04/04/2016 Data Release Frequency: Varies

## ADDITIONAL ENVIRONMENTAL RECORDS

### Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 12/22/2015 Date Data Arrived at EDR: 12/23/2015 Date Made Active in Reports: 02/18/2016 Number of Days to Update: 57 Source: Environmental Protection Agency Telephone: 202-566-2777 Last EDR Contact: 12/21/2015 Next Scheduled EDR Contact: 04/04/2016 Data Release Frequency: Semi-Annually

### SPILLS 90: SPILLS90 data from FirstSearch

Spills 90 includes those spill and release records available exclusively from FirstSearch databases. Typically, they may include chemical, oil and/or hazardous substance spills recorded after 1990. Duplicate records that are already included in EDR incident and release records are not included in Spills 90.

Date of Government Version: 12/11/2001 Date Data Arrived at EDR: 01/03/2013 Date Made Active in Reports: 02/11/2013 Number of Days to Update: 39 Source: FirstSearch Telephone: N/A Last EDR Contact: 01/03/2013 Next Scheduled EDR Contact: N/A Data Release Frequency: No Update Planned

### Other Ascertainable Records

#### RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Date of Government Version: 06/09/2015 Date Data Arrived at EDR: 06/26/2015 Date Made Active in Reports: 09/16/2015 Number of Days to Update: 82 Source: Environmental Protection Agency Telephone: (415) 495-8895 Last EDR Contact: 12/18/2015 Next Scheduled EDR Contact: 04/11/2016 Data Release Frequency: Varies

FUDS: Formerly Used Defense Sites

The listing includes locations of Formerly Used Defense Sites properties where the US Army Corps of Engineers is actively working or will take necessary cleanup actions.

Date of Government Version: 01/31/2015 Date Data Arrived at EDR: 07/08/2015 Date Made Active in Reports: 10/13/2015 Number of Days to Update: 97 Source: U.S. Army Corps of Engineers Telephone: 202-528-4285 Last EDR Contact: 12/11/2015 Next Scheduled EDR Contact: 03/21/2016 Data Release Frequency: Varies

#### DOD: Department of Defense Sites

This data set consists of federally owned or administered lands, administered by the Department of Defense, that have any area equal to or greater than 640 acres of the United States, Puerto Rico, and the U.S. Virgin Islands.

Date of Government Version: 12/31/2005 Date Data Arrived at EDR: 11/10/2006 Date Made Active in Reports: 01/11/2007 Number of Days to Update: 62 Source: USGS Telephone: 888-275-8747 Last EDR Contact: 01/15/2016 Next Scheduled EDR Contact: 04/25/2016 Data Release Frequency: Semi-Annually

#### FEDLAND: Federal and Indian Lands

Federally and Indian administrated lands of the United States. Lands included are administrated by: Army Corps of Engineers, Bureau of Reclamation, National Wild and Scenic River, National Wildlife Refuge, Public Domain Land, Wilderness, Wilderness Study Area, Wildlife Management Area, Bureau of Indian Affairs, Bureau of Land Management, Department of Justice, Forest Service, Fish and Wildlife Service, National Park Service.

Date of Government Version: 12/31/2005 Date Data Arrived at EDR: 02/06/2006 Date Made Active in Reports: 01/11/2007 Number of Days to Update: 339 Source: U.S. Geological Survey Telephone: 888-275-8747 Last EDR Contact: 01/15/2016 Next Scheduled EDR Contact: 04/25/2016 Data Release Frequency: N/A

### SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

### EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

### 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

#### RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

#### RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST	FTTS INSP: FIERA/TSCA Tracking System In	spection & Enforcement Case Listing

HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMT	RA: Uranium Mill Tailings Sites Uranium ore was mined by private companies	for federal government use in national defense programs. When the mills

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

#### FUELS PROGRAM: EPA Fuels Program Registered Listing

This listing includes facilities that are registered under the Part 80 (Code of Federal Regulations) EPA Fuels Programs. All companies now are required to submit new and updated registrations.

Date of Government Version: 11/23/2015 Date Data Arrived at EDR: 11/24/2015 Date Made Active in Reports: 02/18/2016 Number of Days to Update: 86 Source: EPA Telephone: 800-385-6164 Last EDR Contact: 11/24/2015 Next Scheduled EDR Contact: 03/07/2016 Data Release Frequency: Quarterly

ECHO: Enforcement & Compliance History Information

ECHO provides integrated compliance and enforcement information for about 800,000 regulated facilities nationwide.

Date of Government Version: 09/20/2015 Date Data Arrived at EDR: 09/23/2015 Date Made Active in Reports: 01/04/2016 Number of Days to Update: 103 Source: Environmental Protection Agency Telephone: 202-564-2280 Last EDR Contact: 12/21/2015 Next Scheduled EDR Contact: 04/04/2016 Data Release Frequency: Quarterly

# EDR HIGH RISK HISTORICAL RECORDS

### EDR Exclusive Records

### EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Date of Government Version: N/A Date Data Arrived at EDR: N/A Date Made Active in Reports: N/A Number of Days to Update: N/A Source: EDR, Inc. Telephone: N/A Last EDR Contact: N/A Next Scheduled EDR Contact: N/A Data Release Frequency: No Update Planned

# EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Date of Government Version: N/A Date Data Arrived at EDR: N/A Date Made Active in Reports: N/A Number of Days to Update: N/A Source: EDR, Inc. Telephone: N/A Last EDR Contact: N/A Next Scheduled EDR Contact: N/A Data Release Frequency: Varies

### EDR Hist Cleaner: EDR Exclusive Historic Dry Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Date of Government Version: N/A Date Data Arrived at EDR: N/A Date Made Active in Reports: N/A Number of Days to Update: N/A Source: EDR, Inc. Telephone: N/A Last EDR Contact: N/A Next Scheduled EDR Contact: N/A Data Release Frequency: Varies

#### EDR RECOVERED GOVERNMENT ARCHIVES

## Exclusive Recovered Govt. Archives

RGA HWS: Recovered Government Archive State Hazardous Waste Facilities List

The EDR Recovered Government Archive State Hazardous Waste database provides a list of SHWS incidents derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the Department of Environmental Quality in Arizona.

Date of Government Version: N/A Date Data Arrived at EDR: 07/01/2013 Date Made Active in Reports: 01/02/2014 Number of Days to Update: 185 Source: Department of Environmental Quality Telephone: N/A Last EDR Contact: 06/01/2012 Next Scheduled EDR Contact: N/A Data Release Frequency: Varies

RGA LF: Recovered Government Archive Solid Waste Facilities List

The EDR Recovered Government Archive Landfill database provides a list of landfills derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the Department of Environmental Quality in Arizona.

Date of Government Version: N/A Date Data Arrived at EDR: 07/01/2013 Date Made Active in Reports: 01/15/2014 Number of Days to Update: 198 Source: Department of Environmental Quality Telephone: N/A Last EDR Contact: 06/01/2012 Next Scheduled EDR Contact: N/A Data Release Frequency: Varies

### RGA LUST: Recovered Government Archive Leaking Underground Storage Tank

The EDR Recovered Government Archive Leaking Underground Storage Tank database provides a list of LUST incidents derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the Department of Environmental Quality in Arizona.

Date of Government Version: N/A Date Data Arrived at EDR: 07/01/2013 Date Made Active in Reports: 01/02/2014 Number of Days to Update: 185 Source: Department of Environmental Quality Telephone: N/A Last EDR Contact: 06/01/2012 Next Scheduled EDR Contact: N/A Data Release Frequency: Varies

### **OTHER DATABASE(S)**

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

#### CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 07/30/2013 Date Data Arrived at EDR: 08/19/2013 Date Made Active in Reports: 10/03/2013 Number of Days to Update: 45 Source: Department of Energy & Environmental Protection Telephone: 860-424-3375 Last EDR Contact: 02/18/2016 Next Scheduled EDR Contact: 05/30/2016 Data Release Frequency: No Update Planned

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

### AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals. Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services,

a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

April 29, 1976

 Case No.: 264-76
 APPROVED ACCORDING TO PLANS PRESENTED.

 Appellant:
 Mel and Nona Laabs (Owner: Same)

 Subject:
 USE PERMIT requested to alter and expand nonconforming use. Use Permit required. Sec. 110 D.

 Premises:
 8930 North 3rd Street

Mr. Mel Laabs, 9220 North 16th Place, appeared.

There was no opposition present.

DECISION: The request for Use Permit to alter and expand nonconforming use is approved according to plans presented.

FINDINGS OF FACT: The intended remodelling will not be detrimental to the neighborhood.

SUMMARY: Mr. Laabs explains that the intent is to extend an existing overhang with arches "to dress up the place" and for energy conservation. Also, walls at the rear of the property will be reworked to accomodate new City trash pick-up methods. The front building is strictly a residence, not an office, despite the fact that the trailer park's sign is on the building.

This is a nonconforming mobile home park, according to staff. There is a 4' wall around the garbage can aren now.

Before you start to dig, call Blue Stake 602-263-1100

NOTICE - This permit authorizes the above described work to be done in accordance with the approved plans and all applicable City codes and ordinances. Plan approval and permit issuance does not authorize violation of any city code or ordinance. The contractor(s) doing the work and the property owner or tenant/occupant authorizing the work are all legally responsible for complying with all codes and ordinances. This permit expires by limitation and is null and void if work has not started within or ceased for any reason for 180 days, or if work is not completed by the expiration date printed above. Work after this time or beyond the scope of this permit requires a new supplemental permit. This permit can be suspended or revoked for failing to follow the approved plans or for violation of any City code or ordinance. Work within the public right-of-way shall comply with all City standard details and specifications. The contractor is responsible for maintaining streets and sidewalks safe and usable at all times. All barricades shall be approved in advance and shall comply with the City Traffic Barricade Manual.

STATUS: OPEN POST THIS PERMIT ON JOB SITE Before you start to dig, call Blue Stake 602-263-1100

NOTICE - This permit authorizes the above described work to be done in accordance with the approved plans and all applicable City codes and ordinances. Plan approval and permit issuance does not authorize violation of any city code or ordinance. The contractor(s) doing the work and the property owner or tenant/occupant authorizing the work are all legally responsible for complying with all codes and ordinances. This permit expires by limitation and is null and void if work has not started within or ceased for any reason for 180 days, or if work is not completed by the expiration date printed above. Work after this time or beyond the scope of this permit requires a new supplemental permit. This permit can be suspended or revoked for failing to follow the approved plans or for violation of any City code or ordinance. Work within the public right-of-way shall comply with all City standard details and specifications. The contractor is responsible for maintaining streets and

sidewalks safe and usable at all times. All barricades shall be approved in advance and shall comply with the City Traffic Barricade Manual.

# HISTORICAL TITLE REPORT

# YOUR FILE NO: 60488618

ALLANDS FILE NO: 2016-02-065T

Date of Report: February 25, 2016 Title Plant Date\*\*\*: \*\*\*The Title Plant Date reflects the most current data made available by the information sources used at the time the research was performed.

ALLANDS hereby reports a Historical Title Report to the land described below, subject to the items as shown in Schedule B. This is a historical title report ONLY and is neither a guarantee of title, a commitment to insure or a policy of title insurance. Allands is not responsible for errors in the available records. The total liability is limited to the fee paid for this report. This is a confidential, privileged and protected document for the use of AECOM.

- 1. Title to the estate or interest covered by this report is vested in: SCOT E. MARTIN AND LIDA K. MARTIN, GENERAL PARTNERS OF THE SCOT E. MARTIN AND LIDA K. MARTIN FAMILY LIMITED PARTNERSHIP, NUMBER ONE
- 2. By virtue of that certain chain of title attached.
- 3. The land referred to in this report is located in Maricopa County, Arizona, described as follows:

Assessor's No.: 160~50~079

# SEE LEGAL DESCRIPTION ATTACHED

2016-02-065T

## SCHEDULE B

- 1. Lease by and between Spence Investors Inc., Lessors, and Web Service Company, Inc., Lessee, dated 7~11~94, recorded 8~24~94 in Document No. 94~633117.
- 2. Memorandum of Lease by and between Scot and Lida martin Family ltd partnership, Lessor, and Automatic Laundry Company, Ltd., Lessee, dated 2~18-04, recorded 3~10~04 in Document No. 04~ 243451.
- 3. No VEMUR'S, DEUR'S; Environmental Liens, or activity and use limitations, if any, were found currently recorded against the property as searched at the subject county recorders office. \*\*\*

<sup>\*\*\*</sup> A.R.S. 49-152. This states that the Director of the Arizona Department of Environmental Quality shall allow property owners, who have voluntarily elected to remediate their property for nonresidential uses, to record in the applicable county recorders office a VEMUR limiting, by legal description, the area necessary to protect public health and the environment to nonresidential uses if contamination remains on the property at or above certain levels. In accordance with Arizona Administrative Code (A.A.C.) R18-7-201 et. Seq., a Declaration of Environmental Use Restriction (DEUR) is a voluntary notice to deed which restricts the use of a property to non-residential use. Effective July 18, 2000, the Declaration of Environmental Use Restriction (DEUR) replaced the Voluntary Environmental Mitigation Use Restriction (VEMUR) as a restrictive use covenant.

# CHAIN OF TITLE

- 1. Warranty Deed from Mary L. Rifley and W. J. Rifley, her husband to Mary M. Mahony, a spinster, dated 4~7~1927, recorded 4~8~1927 in Book 209 of Deeds, page 311. (lots 14 & 16)

# CAUTION! USERS SHOULD INDEPENDENTLY RESEARCH AND VERIFY INFORMATION ON THIS WEBSITE BEFORE RELYING ON IT.

The Assessor's Office has compiled information on this website that it uses to identify, classify, and value real and personal property. Please contact the Maricopa County S.T.A.R. Center at (602) 506-3406 if you believe any information is incomplete, out of date, or incorrect so that appropriate corrections can be addressed. Please note that a statutory process is also available to correct errors pursuant to Arizona Revised Statutes 42-16254.

The Assessor does not guarantee that any information provided on this website is accurate, complete, or current. In many instances, the Assessor has gathered information from independent sources and made it available on this site, and the original information may have contained errors and omissions. Errors and omissions may also have occurred in the process of gathering, interpreting, and reporting the information. Information on the website is not updated in "real time". In addition, users are cautioned that the process used on this site to illustrate the boundaries of the adjacent parcels is not always consistent with the recorded documents for such parcels. The parcel boundaries depicted on this site are for illustrative purposes only, and the exact relationship of adjacent parcels should be independently researched and verified. The information provided on this site is not the equivalent of a title report or a real estate survey. Users should independently research, investigate and verify all information before relying on it or in the preparation of legal documents.

By using this website, you acknowledge having read the above and waive any right you may have to claim against Maricopa County, its officers, employees, and contractors arising out of my reliance on or the use of the information provided on this website.

#### MEMORANDUM OF LEASE OF REAL PROPERTY

THIS MEMORANDUM OF LEASE is entered into this <u>18th</u> day of <u>February,2004</u>, by and between Scot and Lida Martin Family LTD Partnership, (hereinafter referred to as "Lessor"), and Automatic Laundry Company, LTD. (hereinafter referred to as "Lessee"). Lessor hereby does lease to Lessee and Lessee does hereby accept the exclusive possession of all common laundry facility(ies), now existing and hereafter created, and located on the real property and improvements consisting of 29 units, located <u>8930 N 3<sup>rd</sup> St.,which real property and improvements are herein referred to as the "property" and legally described in Exhibit "A" attached hereto, and by this reference, incorporated herein as though fully set forth. Lessor warrants and represents that only <u>0</u> units are plumbed with their own washer or dryer connections.</u>

1. Exclusive Use and Possession of Leased Premises described as the <u>1</u> area(s), designated laundry room(s) each containing approximately <u>120</u> square feet, located <u>on the north side in a</u> freestanding building. Lessor grants Lessee the exclusive right of possession to occupy and use the leased premises as a laundry facility (ies) which shall be the sole and exclusive laundry facility (ies) in the Residential Complex. Lessor individually or by agreement, shall not furnish, provide, sell, lease or install any washers or dryers in any of the dwelling units in the Residential Complex.

2. Term. The term of this Lease is not disclosed herein, but it is not less than 3 years nor more than 20 years from the date of this Lease.

3. Assignment or Transfer. This Lease shall run with the land and be binding upon and inure to the benefit of the parties hereto, their respective personal representatives, successors, heirs, grantees and assigns.

4. Lessor and Lessee have entered into an unrecorded Lease containing the provisions included herein and certain additional provisions. The provisions of the unrecorded Lease are incorporated herein by this reference. A copy of the unrecorded Lease is available for persons having a legitimate interest in the property, at the home office of Lessee located at 54 North 48th Avenue, Phoenix, Arizona 85043.

# Archaeology Assessment Result

**Project Name: Phase I ESA** 

ND30040038

Project Location: 8930 N. 3<sup>rd</sup> Street

**Project Sponsor: Streets/EAS (James Marshall)** 

**Review Agencies:** City of Phoenix

Survey Monitoring Testing Data Recovery

#### **Comments:**

No known archaeological sites are located within this project area.

#### **Recommendations:**

No archaeological work is necessary for this project. However, if any archaeological materials are encountered during construction, all ground-disturbing activities must cease within 10 meters of the discovery and the City of Phoenix Archaeology Office must be notified immediately and allowed time to properly assess the materials.
