\*WSD may request to add or delete remove equipment, devices, or locations during this contract. If equipment, devices, or locations are added, Contractor will perform repairs or maintenance service as requested.

### III. This addendum answers the following questions, which the City of Phoenix received (before, during or after) the subject solicitation’s pre-proposal conference:

- 1. Question:** I have a question related to the scope of work and exact quantities of devices on each system. We need to know how many fire alarm panels, releasing panels, horn strobes, duct detectors, smoke detectors, heat detectors, pull stations, waterflow switches, tamper switches, power supplies, annunciators, and fire sprinkler risers and pre actions systems.
- 2. Question:** Can your team please provide the address of each of your locations and include the availability of times to properly test and inspect each of the COP building locations?
- 3.
