REQUEST FOR QUALIFICATIONS

The City of Phoenix is seeking a qualified consultant team to provide Engineering services for the Road Safety Action Plan Safe Streets and Roads for All ReVISIONing Indian School Road project. Services will include design and coordination with a Construction Manager at Risk during design and construction. The project is located at Indian School Road from 91st Avenue to 39th Avenue. The estimated construction cost is \$31.2 million.

SECTION I – PROJECT DESCRIPTION

In September 2022 the City of Phoenix committed resources to Vision Zero by adopting the Roadway Safety Action Plan (RSAP). The ReVISIONing Indian School Road project was identified to address a critical corridor through targeted and proven safety countermeasures to improve pedestrian and multi-modal transportation along Indian School Road from 91st Avenue to 39th Avenue. The project includes rebuilding intersections and traffic signals, adding pedestrian hybrid beacons (HAWKS), updating curb ramps and driveways to ADA standards, street lighting, and other roadway safety measures. The design of this corridor will be crafted in collaboration with a Construction Manager at Risk.

SECTION II – SCOPE OF WORK

The scope of the project is to develop a design concept report, final design plans, specifications, and cost estimates for roadway rehabilitation by implementing proven safety practices to reduce crashes and address safety issues involving pedestrians, bicyclists, people taking transit and drivers. The City will use its own resources for the Post-Design Services. To supplement the final construction documents the design team will be required to complete the following scope of work, includes but not limited to:

- Data collection.
- Topographic surveying.
- Traffic analysis and design including signal design, signing, striping, access management, and street lighting.
- Geotechnical analysis and recommendations.
- Utility coordination to identify utility conflicts. The design team will be required to provide pothole exhibits and prepare a list of conflicts, address utility comments and attend utility coordination meetings.
- Identify areas where additional right-of-way (ROW) is needed and prepare documents for ROW acquisition and temporary construction easements. The design team will prepare ROW stripe maps, affected parcel lists, legal descriptions, and exhibits.
- The design team will coordinate with a public engagement firm contracted by the City. The consultant will provide exhibits, presentations, and attend and present at public meetings.
- The design team will provide a Baseline Report for various safety performance measurements as required by the Federal Highway Administration.
- The consultant will collaborate and coordinate closely with a Construction Manager at Risk contractor for constructability reviews, cost estimates, scheduling, and construction sequencing.

Safety enhancements along Indian School Road includes but are not limited to:

- Traffic signal reconstruction to current standards. Intersection evaluations to provide greater signal efficiency and coordination, including evaluating adaptive traffic signal control, and left turn phasing to reduce conflicting movements.
- Pedestrian Hybrid Beacons or HAWKS.
- Street light installation.

- Raised medians at various locations along the project corridor to reduce conflict points.
- Pavement rehabilitation.

The Project Narrative for this project was prepared for the 2023 Safe Streets for All (SS4A) Implementation Grant Application. A copy of this document is available for download on the City's website at the following link:
