# REQUEST FOR QUALIFICATIONS

The City of Phoenix is seeking a qualified consultant team to provide engineering services to complete improvements identified in a preliminary roadway and drainage analysis for the Street Transportation Department. Services may include addressing current pavement distresses, improving drainage, providing accessible pedestrian routes, and other right-of-way improvements. The project site is located on 13th Street and extends from Van Buren Street to the north side of Moreland Street. The estimated construction cost is \$4 Million.

## **SECTION I – PROJECT DESCRIPTION**

In 2009, The City of Phoenix conducted a preliminary roadway and drainage analysis to explore alternatives to improve 13<sup>th</sup> Street. The goal of this project is to complete the improvements as shown on the report for Alternative 1 – Full Street Improvements to Roadway & Drainage. 13th Street is classified as a local street; however, sections of this street have additional right of way. In these areas, the city would like to evaluate the potential for other uses including additional pavement, on street parking, or other facilities.

The scope of the project may include bringing 13<sup>th</sup> Street to current City standards for cross-sections. Elements of the project include: paving, curb, gutters, sidewalk removal and replacements, driveway entrances, ADA ramps, street lights, alley entrances, catch basins, storm drain pipes, utility adjustments and relocations, valley gutters, decomposed granite, fire hydrant and water meter relocations as well as abandonment of existing drywells following the applicable laws and regulations.

A preliminary roadway and drainage analysis ~~report has been made available for download on the City's website.~~ is attached as Exhibit A.

## **SECTION II – SCOPE OF WORK**

The Design team will be expected to complete data collection and field survey, design of construction plans, engineer's cost estimate, special provisions, drainage report, and geotechnical report.

The scope of work may include design engineering services for street construction improvements; sidewalk and curb ramps to meet current ADA guidelines; curb, gutter, and driveways; street lighting; geotechnical testing and pavement recommendation; drainage evaluation and storm drain system; various utility adjustments; miscellaneous removals; minor landscape and irrigation improvements, as needed; signing and striping modifications, as needed; and other ancillary items. The selected consultant will also be responsible for preparing the documentation needed for any additional Right of Way acquisition.
